REPORT.

TO THE MOST HON.

THE MARQUESS OF LOTHIAN, K.T.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 23*rd December* 1890.

MY LORD,

I had the honour in 1889, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict. cap. 80, to transmit to you as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1888, along with the usual explanation and commentary.

At the same time, my Twenty-fourth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict. cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1888).

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

As bearing upon the general health and well-being of the community at large, we may note that during the year 1888 there was throughout Scotland a great deficiency of sunshine, a large excess of north-easterly and deficiency of southerly winds, with a remarkable lowness of temperature, which for the year, and for the country as a whole, was 1°·2 under the average of past years. The rainfall over Scotland was less than usual.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1888, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.

Principal Towns above 25000 inhabitants. Large Towns above 10000 and under 25000 inhabitants. The Small Towns from 3000 to 10000 inhabitants from 1855 to 1871—but from 1871 and upwards the Small Towns have from 2000 to 10000 of population.

the year under review, is 4,034,156; of this number 1,956,790 are males, and 2,077,366 females.

This population is as usual distributed over five groups of Registration Districts. In the Principal Town Districts the sexes together number 1,588,350, the males alone 757,342, the females 831,008; in the Large Town Districts the total population amounts to 451,982—the males 222,125, and the females 229,857; in the Small Town Districts the total is 853,161, of these 414,223 being males, and 438,938 females; the Mainland Rural Districts have a gross population of 1,011,419, the males here being estimated at 501,821, the females 509,598; the Insular-Rural Districts having a total of 129,244, males 61,279, females 67,965.

BIRTHS.

During 1888 there were registered in Scotland 123,269 Births, fewer than those in the previous year by 1149, and giving a birth-rate for the country of 3·06 per cent.; or in other words, 306 births for every ten thousand of the estimated population, a still lower rate than that for last year, which

was the lowest recorded since these returns were first made. The mean birth-rate for the last ten years, 1878 to 1887, is 3·313 per cent.

The male births number 63,129, the female, 60,140, the former thus exceeding the latter by 2989. The births outnumber the deaths by 52,095.

The illegitimate births alone amount to 9968, which is equivalent to

TABLE VIII.—Births, 1888. Number of Legitimate, Illegitimate, and Total Births in Scotland and its Five Groups of Districts, distinguishing the Sexes. Also the number of Twin and Triplet Births.

FIVE GROUPS OF DISTRICTS.	TOTAL BIRTHS.			Legitimate Births.			Illegitimate Births.			Twin Births.	Triplet Births.
	Males.	Fem.	Both Sexes.	Males.	Fem.	Both Sexes.	Males.	Fem.	Both Sexes.		
Principal Town	26069	24502	50571	24043	22632	46675	2026	1870	3896	603	1
Large Town	7729	7263	14992	7237	6753	13990	492	510	1002	141	2
Small Town	13419	12927	26346	12448	11936	24384	971	991	1962	288	4
Mainland-Rural	14343	13950	28293	12848	12533	25381	1495	1417	2912	321	5
Insular-Rural	1569	1498	3067	1472	1399	2871	97	99	196	27	-
SCOTLAND . .	63129	60140	123269	58048	55253	113301	5081	4887	9968	1380	12

were registered—males, 13,419, females, 12,927, together affording a birth-rate of 3·09 per cent.; the mean for the last ten years being 3·324 per cent. In the Mainland-Rural Districts the natal events are 28,293, of which 14,343 are males and 13,950 females, equivalent to a rate of 2·80 per cent.; the mean for the last ten years being 2·960 per cent.; and in the Insular-Rural Districts the births number 3067, of those 1369 being males, and 1498 females, or at the rate of 2·37 per cent.; the mean for the previous ten years being 2·479 per cent.

In the counties, as shown in Table VI., the birth-rate varies considerably from 2·032 per cent. of population in Orkney, 2·114 per cent. in Perth, 2·260 per cent. in Bute, 2·263 per cent. in Sutherland, and 2·280 per cent. in Selkirk, to 3·198 per cent. in Banff, 3·256 per cent. in Stirling, 3·445 per cent. in Lanark, and 4·627 per cent. in Linlithgow, which latter county has since 1880 thus headed the list, excepting for the years 1882 and 1883.

Of the 123,269 births recorded in Scotland, 9968 were illegitimate, and occurred in the five districts as follow (Tables VIII. and IX.). In the Principal Town Districts these births number 3896, or in the proportion of 7·7 per cent. of the whole—the males are 2026, the females 1870; in the Large Town Districts the total is 1002, or 6·7 per cent. of the whole—males being 492, females 510; in the Small Town Districts they are 1962, or 7·4 per cent. of all—males 971, females 991; in the Mainland-Rural Districts the total stands at 2912, or 10·3 per cent. of all therein registered—males 1495, being in this case a larger number than the females, which is 1417; and in the Insular-Rural Districts the total is 196, or 6·4 per cent. of all—males 97, females 99. So that throughout Scotland one child in every twelve was born without heed of the parents to the marriage ceremony; in the Principal Town Districts the ratio was one in thirteen, in the Large Town Districts it was one in fifteen, in the Small Town Districts one in thirteen, in the Mainland-Rural Districts one in ten, and in the Insular-Rural Districts one in every sixteen.

Table V*a*. and V*b*. afford information of a corresponding nature as to the Principal Towns themselves. Thus in Dundee 10·2 per cent. of the total births there registered are illegitimate; in Aberdeen, which comes next, the proportion is 9·8 per cent., followed by Perth, with 9·5 per cent.; Edinburgh, with 8·7 per cent.; Glasgow, 8·1 per cent.; Kilmarnock, 6·4 per

---

TABLE IX.—Proportion of Births in 1888. Percentage of Births to Population, and of Illegitimate to the Total Births; also the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; with the Proportion of Mothers who bare Twins and Triplets in Scotland, and its Five Groups of Districts in 1888.

FIVE GROUPS OF DISTRICTS.	Percentage of Births to Population.	Percentage of Illegit. to Total Births.	Proportion of Males to every 100 Females in the			Proportion of MOTHERS who bare TWINS. — One in every	Proportion of MOTHERS who bare TRIPLETS. — One in every
			Total Births.	Legitimate Births.	Illegit. Births.		
Principal Town	3·184	7·7	106·4	106·2	108·3	82·9	49966
Large Town	3·317	6·7	106·4	107·2	96·5	105·3	7423
Small Town	3·088	7·4	103·8	104·3	98·0	90·5	6512

Insular-Rural	2·373	6·4	104·7	105·2	98·0	112·6	–
SCOTLAND . . .	3·056	8·09	105·0	105·1	104·0	88·3	10155

cent.; Leith, 5·9 per cent.; Paisley, 5·8 per cent.; Greenock, 5·6 per cent.; and lastly Landward and Suburban of Glasgow, with 4·4 per cent.

Table VI. indicates how the percentage of births of a like nature varies in each county of Scotland, from, on the one hand, 3·5 in Shetland, 4·6 in Bute, 4·8 in Dumbarton, 5·3 in Renfrew, 5·4 in Ross and Cromarty, 5·7 in Fife, and 5·9 in Orkney, to 13·0 in Kirkcudbright, 13·3 in Nairn and in Aberdeen, 14·3 in Dumfries, 15·2 in Banff and Wigtown, and 15·8 in Elgin. In eleven counties the rate is under 7 per cent., and in ten it is over 12 per cent.

The male births registered throughout the year amount to 63,129, and the female to 60,140, so that for every 100 of the latter 105·0 of the former are born. In the case of the legitimate births alone the ratio is as 100 to 105·1, and of the illegitimate alone as 100 to 104·0.

As 1380 mothers during the year bore twins, and 12 mothers bore triplets, the total number of mothers was 121,865, of whom one in every 88 bore two, and one in every 10,155 bore three children at a birth.

The births were registered in Scotland during each month as follows: 8.89 per cent. of them during May, 8·82 per cent. during October, 8·68 per cent. during June, 8·47 per cent. during July, 8·46 per cent. during March and April, 8·39 per cent. during January, 8·27 per cent. during August, 8·23 per cent. during December, 7·89 per cent. during February, 7·80 per cent. during November, and 7·64 per cent. during September. When the months are equalised to a similar length of 31 days the percentage of births is 8·80 for June, 8·73 for May, 8·65 for October, 8·58 for April, 8·57 for February, 8·31 for July, 8·30 for March, 8·22 for January, 8·11 for August, 8·08 for December, 7·91 for November, and 7·74 for September.

The birth-rate per ten thousand of the population of the following European States during 1888 is—379 in Austria, 377 in Prussia, 367 in German Empire, 366 in Italy, 337 in the Netherlands, 317 in Denmark, 308 in Norway, 291 in Belgium, 277 in Switzerland, and 231 in France

MARRIAGES.

25,305 marriages were registered throughout Scotland during 1888, being 429 more than last year, and giving a marriage rate of 62·73 per ten

TABLE X.—Marriages, 1888. Number of Marriages contracted in Scotland and its Five Groups of Districts according to the Rites of the several Religious Denominations, and their Proportion to the Total Marriages in each Group.

thousand of the population, somewhat higher than that for 1887. The mean average rate for the last ten years, 1878–1887, is 64·4 per ten thousand of the inhabitants. The rate for England for the present year is 71 per ten thousand.

In the five Registration Districts the marriage-rate varies considerably, being 77·6 per ten thousand of the estimated population of the Principal Town Districts, the mean in the same for the last ten years is 82·3 in like proportion; in the Large Town Districts the rate is 65·4 per ten thousand, 68·1 the mean for the last ten years; in the Small Town Districts it is

---

56·8 per ten thousand, the mean for the last ten years 60·8; in the Mainland-Rural Districts it is 47·0 per ten thousand, 51·7 being the mean for the decennial period; while it is but 32·7 for each ten thousand of the inhabitants of the Insular-Rural Districts for the present year, the mean for the last ten being 40·9 in like proportion. The ratios for 1888, when compared with the corresponding for the previous year, show an increase in the case of the Principal and Large Town Districts, but a decrease in the other three, viz., the Small Town and both Rural Districts.

As to the counties, Table VI. shows the marriage-rate to be in five above that of the country at large, viz.—in Ayr, where it is 62·8 per ten thousand of the population of the same; in Renfrew, where it is 66·5; in Lanark, 74·8; in Edinburgh, 75·0; and in Linlithgow, 77·1. Those counties with the lowest marriage-rate are Shetland, with 39·8 per ten thousand of the inhabitants; Caithness, with 39·4; Berwick, with 38·3; Ross and Cromarty, with 37·4; Argyle, with 32·0; and Sutherland, with 21·6. In fourteen counties this rate is above the same for last year, in nineteen it is below.

Table V*a*. indicates the number and proportion of marriages in each of the Principal Towns of Scotland to be—92·2 per ten thousand of the

---

inhabitants of Glasgow, in Edinburgh it is 82·2, in Paisley 77·7, in Aberdeen 76·8, in Leith 75·6, in Kilmarnock 73·4, in Dundee 70·0, in Perth 68·0, in Greenock 61·0, and in Glasgow, Landward and Suburban, 53·5.

The fertility of each marriage is estimated in the usual manner. The number of marriages registered during 1882 is 26,596, and the legitimate births registered during the year under review are 113,301, so that $\frac{113301}{26596}$ gives 4·26 as the average fertility of each marriage, or 426 children were born to every 100 marriages. In England the average number of children born was 4·11 to each marriage, or 411 to every 100 marriages.

Tables XI. and XII. afford information as to the number and proportion of marriages performed by the clergy of the various denominations in Scotland. Thus of the total 25,305 celebrations, 11,647 were performed by the ministers of the Established Church of Scotland, 5052 by those of the Free Church, 2876 by those of the United Presbyterian Church, 2464 by those of the Roman Catholic Church, and 783 by the clergy of the Episcopal Church. In 1724 cases the denomination of the officiating

1887	46·99	19·56	11·77	9·74	2·75	6·65	0·01	2·53
1888	46·03	19·96	11·37	9·74	3·09	6·81	0·00	3·00

minister is other than any of the above, while 759 of the marriages were irregular, a larger number of the latter than has yet been recorded.

In other words, 46·03 per cent. of the total marriages were celebrated in accordance with the rites of the Established Church of Scotland, 19·96 per cent. with those of the Free Church, 11·37 per cent. with those of the United Presbyterian Church, 9·74 per cent. with those of the Roman Catholic Church, and 3·09 per cent. with those of the Episcopal Church. In the case of 6·81 per cent. the officiating clergyman was of some other denomination than the before mentioned, and 3·00 per cent. of the marriages were irregular.

These ratios indicate a relative increase in the marriages performed during the present year over these for 1887 by the officiating pastors of the Free Church, Episcopal Church, and those of other denominations than specially mentioned, as also in the irregular marriages, the reverse being the case in those performed by the ministers of the Established Church of Scotland and United Presbyterian Church, while in the case of the Roman Catholic Church the proportion is exactly the same as that for last year.

On looking back for the last thirty-four years, since 1855, we find that of the total marriages which have been registered during that period 45·56 per cent. of the couples have been united in accordance with the formulæ of the Established Church of Scotland, 22·29 per cent. in accordance with those of the Free Church, 13·18 per cent. with those of the United Presbyterian Church, 9·26 per cent. with those of the Roman Catholic Church, and 2·37 per cent. with those of the Episcopal Church. 6·10 per cent. were performed by clergymen of denominations other than the above, 0·27

per cent. by those whose denomination is not particularized, and 0·96 per cent. of the whole have been irregular in character.

Table X*a.* gives the number and percentage of marriages as performed according to the customs of the various denominations in each Principal Town, and County in Scotland during the year 1888. We have just stated the proportions of marriages as performed by the clergy of various denominations during the year in Scotland, and on firstly considering the Towns, it is seen that in two—Aberdeen and Leith—50·00 per cent., or more of the marriages, were performed by clergy of the Established Church of Scotland, the smallest proportion of such being in Glasgow, 33·28 per cent., and Paisley, 32·15 per cent. The highest proportions of marriages in accordance with the form of the Free Church occur in Glasgow Landward and Suburban, 22·30 per cent., in Edinburgh, 22·96 per cent., and in Kilmarnock, 29·50 per cent.; the lowest being 16·87 per cent. in Glasgow, and 15·20 per cent. in Dundee. The highest percentage of marriages performed by ministers of the United Presbyterian Church occurs in Paisley, 14·40, and in Leith, 14·42; the lowest in Greenock, 6·17, and in Aberdeen, 5·89. Marriages in accordance with the rites of the Roman Catholic Church vary from 17·95 per cent. in Paisley, and 21·49 per cent. in Greenock—the highest—to 5·88 per cent. in Perth, and 1·74 per cent. in Aberdeen. Episcopalian marriages are most numerous in Dundee, with 8·00 per cent., and Edinburgh, with 8·01 per cent.; fewest in Glasgow, with 2·27 per cent., Glasgow, Landward and Suburban with 1·94 per cent., and 0·50 per cent. in Kilmarnock. Of marriages solemnized in accordance with the forms of other denominations than the above 11·21 per cent. are registered in Glasgow, and 12·43 per cent. in Aberdeen, being lowest in Edinburgh, 5·32 per cent., and in Leith, 4·63 per cent. The irregular marriages are highest in Edinburgh, 6·85 per cent., and in Glasgow, 7·46 per cent.; lowest in Glasgow, Landward and Suburban, 2·62 per cent., in Greenock, 2·55 per cent., and in Paisley, 1·67 per cent.

In nineteen of the counties it is seen that 50·00 per cent. or over of the marriages fall under the heading Established Church of Scotland, the highest proportion being 68·57 per cent. in Peebles, 70·73 per cent. in

TOTAL	100·00	100·00	100·00	100·00	100·00	100·00	100·00	100·00	100·00	100·00	100·00	100·00

Wigtown, 70·80 per cent. in Shetland, 71·43 per cent. in Kirkcudbright, and 74·06 per cent. in Kincardine. The other end of the scale is represented in Dumbarton, with 35·63 per cent., in Nairn, with 32·73 per cent., in Sutherland, with 27·66 per cent.; and in Ross and Cromarty, with 15·17 per cent. As to the Free Church, in three counties the rate is over 50·00 per cent., in Inverness it is 53·24 per cent., in Sutherland, 72·34 per cent., and in Ross and Cromarty 82·41 per cent.: in twenty-one counties it amounts to 20·00 per cent. or less, being lowest in Kincardine, 13·68 per cent., in Clackmannan 13·60 per cent., in Kirkcudbright 12·05 per cent., in Linlithgow 11·55 per cent., and in Shetland 11·50 per cent. Marriages in connection with the United Presbyterian Church stand highest in Berwick, where 20·45 per cent. of the whole were thus acknowledged, in Selkirk 21·17 per cent., in Orkney 22·70 per cent., and in Kinross 30·95 per cent., being lowest in Caithness, 2·60 per cent.; Ross and Cromarty 1·38 per cent., and Inverness 1·08 per cent. The nuptials performed by clergy of the Roman Catholic Church occur in greatest proportion in Forfar, 10·08 per cent., in Linlithgow 10·42 per cent., in Lanark 15·49 per cent., in Renfrew 19·31 per cent., and in Dumbarton 21·65 per cent.; lowest in Orkney, 0·71 per cent., in Caithness 0·65 per cent., and in Ross and Cromarty 0·34 per cent., there being none in Shetland, Sutherland, Kinross or Berwick. Episcopalian unions bulk largest in Roxburgh 4·56 per cent., in Renfrew 4·65 per cent., in Forfar 5·95 per cent., in Kincardine 6·13 per cent., and in Edinburgh 6·40 per cent., the reverse occurring in Ross and Cromarty, 0·69 per cent., in Caithness 0·65 per cent., in Wigtown 0·49 per cent., and in Banff 0·30 per cent., there being none in Shetland, Orkney, Sutherland, Nairn, Elgin, Kinross or Berwick. Marriages performed by clergy of other denominations than the above are most numerous in Lanark, 10·07 per cent., in Shetland 10·62 per cent., and in Nairn 10·91 per cent.; least so in Kincardine, 0·94 per cent., in Linlithgow 0·56 per cent., and in Inverness 0·27 per cent., there being none in Sutherland, Ross and Cromarty, Kinross or Bute. Irregular marriages are most prominent in Aberdeen, 2·49 per cent., in Forfar 3·04 per cent., in Lanark 5·12 per cent., and in Edinburgh 5·21 per cent.; least so in Dumbarton, 0·57 per cent., in Stirling 0·55 per cent., in Ayr 0·41 per cent., and in Banff 0·30 per cent., there being none in Shetland, Sutherland, Ross and Cromarty, Nairn, Kincardine, Kinross,

Argyll, Bute, Haddington, Peebles, Roxburgh, Dumfries, Kirkcudbright or Wigtown.

Of the 25,305 couples married during the year 1888, all but 3 of the husbands and 8 of the wives stated their age on the registers. Of the former 1664, or 6·58 per cent., were under 21 years of age, while 5168, or 20·42 per cent., of the latter had attained like years. Five of the brides were under 16 years, and 20 of the bridegrooms were under 18 years of age on entering into matrimony. Twenty-six of the husbands were over 70, two of them being over 80 at marriage, one bride having attained the mature age of between 70 and 75 years.

The proportions of men and women marrying at different ages is shown on Table XIV. Thus while 2·55 in every 100 of the husbands marrying during the year in Scotland were 20 years or under at the time of the ceremony, 11·98 is the corresponding ratio among the wives, proportions exceeded in the case of the former in the Principal Town Districts and Small Town Districts, as also in that of the latter, but in their case with the addition of the Large Town Districts also. 35·82 per cent. of the husbands were between 20 and 25 years of age at marriage, 45·47 being the corresponding percentage among the wives, proportions which are exceeded in

the case of the former in the three Town Districts, while in that of the wives the same occurs in the Large and Small Town Districts. At ages between 25 and 30 years 32·65 per cent. of the husbands and 25·12 per cent. of the wives were married in Scotland, proportions exceeded in the case of the former in the Small Town Districts and Mainland Rural Districts, as also with the wives in the two Rural Districts. Between 30 and 35 years, 13·91 per cent. of the husbands married in Scotland and 8·67 per cent. of the wives, exceeded in both cases in the Rural Districts alone; and during the following quinquennial age period, 35–40 years but 6·47 per cent. of the husbands married, and 4·14 per cent. of the wives, ratios exceeded in the case of the former in the Mainland and Insular-Rural Districts, and in that of the latter in the Principal Town and both Rural Districts. After this age the percentage of those who marry rapidly declines, and that for both sexes.

During the year under consideration 21,807 bachelors espoused spinsters, 672 bachelors espoused widows, 2078 widowers mated with spinsters, and 741 widowers married widows; or 86·18 per cent. of the total marriages were between bachelors and spinsters, 2·60 per cent. between

GLASGOW	93·69	88·25	6·31	11·75	8·41	23·59	83·64	4·08	7·83	4·45

From Table XVIII. it is seen that while 96·05 per cent. of the men who married throughout Scotland during the year signed their names on the register, 92·62 is the corresponding percentage among the women, leaving 3·95 per cent. of the former, and 7·38 per cent. of the latter who contented themselves by adhibiting their "mark" to the like document, figures showing a continued improvement, and indicating the presence of the schoolmaster. In the five Registration Districts these proportions vary somewhat; thus in the Principal Town Districts 95·90 per cent. of the husbands and 91·95 per cent. of the wives wrote, in the Large Town Districts 94·62 and 92·09 are the corresponding percentages, in the Small Town Districts they are 96·31, and 92·74 per cent., in the Mainland-Rural Districts, where they are highest 98·09 and 96·70 per cent.; while in the Insular-Rural Districts, which are lowest, they are 84·36 per cent. in the case of the husbands and 68·48 per cent. in that of the wives.

Among the counties the chief failure in this respect is seen to be in Ross and Cromarty, where 15·86 per cent. and 37·24 per cent. of the subscribing parties used "mark," and in Inverness 12·97 per cent. and 22·97 per cent. did likewise. Of the wives alone 19·15 per cent. in Sutherland, 17·70 per cent. in Shetland, 10·77 per cent. in Lanark, 9·59 per cent. in Forfar, and 9·58 per cent. in Argyll did the same. In Kinross the whole of both bridegrooms and brides wrote their names, as also did the former in Peebles and Selkirk.

The two last lines of Table XVIII. give, as usual, like information as to the two chief cities in Scotland, and show how in Edinburgh 98·66 per cent. of the husbands, and 97·64 per cent. of the wives wrote their names, leaving 1·34 per cent. and 2·36 per cent. respectively who used "mark"; and in Glasgow, 93·69 per cent. of the former, and 88·25 per cent. of the latter wrote, leaving 6·31 per cent. and 11·75 per cent. respectively to use "mark."

13·47 per cent. of the marriages were registered during the month of June, 13·20 per cent. during December, 12·35 per cent. during January, 11·15 per cent. during July, 8·16 per cent. during November, 7·67 per cent. during April, 6·85 per cent. during October, 6·37 per cent. during September, 5·78 per cent. during August, 5·60 per cent. during March, 5·55 per cent. during February, and 3·85 per cent. during May.

The marriages per ten thousand of the inhabitants in the following European States during the year 1888 were as follows—81 in Prussia, 79 in Austria and the German Empire, 78 in Italy, 74 in Belgium, 72 in France, 71 in Denmark and Switzerland, and 69 in the Netherlands.

DEATHS.

The total registered deaths throughout Scotland during 1888 are 71,174, of those 34,953 being males, and 36,221 females, giving a mortality rate of 176 in every ten thousand of the population as estimated, or 1 death in every 57 of the inhabitants. Among the males alone the rate is 179, and among the females it is 174, in every ten thousand of the respective sexes; 1036 female deaths were registered for every 1000 males. The mean death-rate for the last ten years is 196 per ten thousand of the population.

In the five great Registration Districts into which Scotland is divided, the number of deaths and the rate of mortality is in each as follows:—in

the Principal Town Districts the total deaths are 30,505, which is equal to a mortality rate of 192 per ten thousand of the population of the same, the male deaths alone numbering 15,100, and the female 15,405; in the Large Town Districts the deaths are 8400, at a rate of 186 per ten thousand of population, the male exits being 4153, the female 4247; in the Small Town Districts the total amount to 14,284, or 167 per ten thousand of population, males numbering 6923, females 7361; in the Mainland-Rural Districts the total is 15,927, or 158 per ten thousand of population, males 7851, females 8076; while in the Insular-Rural Districts 2058 is the total, equal to a mortality rate of 159 per ten thousand, 926 of them being of the male, and 1132 of the female sex. The death-rate is thus higher in the Urban than in the Rural Districts, and more so in the Principal than in the other two Town Districts.

The number of deaths and their proportional rate in each of the Principal Towns is found on Tables XXI. and XXII. Thus in Glasgow the deaths amount to 11,681, or at the rate of 22·2 per thousand of the inhabitants as estimated; in Edinburgh the deaths are 4738, a rate of 18·0 per thousand; in Dundee the deaths are 2957, a rate of 18·4 per thousand; in Aberdeen they number 2179, a rate of 18·3 per thousand; in Greenock they are 1230, being at the rate of 16·0 per thousand; in Leith they are 1175, or at

a rate of 15·8 per thousand; in Paisley they are 1593, or 25·8 per thousand; in Perth 588, or 18·1 per thousand; in Kilmarnock 566, or 20·8 per thousand; and in Glasgow, Landward and Suburban, the deaths number 3798, being at the rate of 15·2 in every thousand of the presumed population of the same. Table XX. indicates how in the Principal and Large Town Districts the mortality rate in the case of both males and females exceeds that for Scotland as a whole.

In Tables XXIII. and XXIV. will be found the number of deaths and their corresponding ratios to the estimated population at various ages for males and females in Scotland, and in each of its five Groups of Districts. Thus in Scotland the percentage of deaths of infants under one year of age is in the case of the males 12·908, and of the females 10·598, proportions which are exceeded in the case of both sexes in the Principal and Large Town Districts, being for the males in the former districts 14·691 per cent., and in the latter 14·742 per cent; and for the females 12·046 and 11·625 per cent. respectively. They gradually fall in the other three districts, the minimum being attained in the Insular-Rural Districts, viz., 7·478 per cent. and 6·892 per cent., being almost one half of the same in the Principal and Large Town Districts. In all five districts the male death-rate at this age is in excess of that of the female.

Under two years of age the rate has fallen very much, being 4·806 per

---

cent. among the males and 4·758 per cent. among the females in Scotland as a whole, ratios exceeded in the case of both sexes in the Principal and Large Town Districts. In the Large Town Districts, Small Town Districts, and both Rural Districts the female rate is higher than the male.

Under three years of age the ratios for Scotland are 2·031 per cent. in the case of the males, and 1·975 per cent. in that of the females, exceeded only in the case of children of this age, and for both sexes in the Principal Town Districts, and of the female alone in the Large Town Districts. In the Large Town Districts, Small Town Districts, and Insular-Rural Districts the female rate is above that of the male.

Under four years of age the death-rate for males and females in Scotland does not differ much, being in the case of the former 1·262 per cent. and of the latter 1·283 per cent., ratios which are over-topped in the case of both sexes in the Principal and Large Town Districts. In the Principal Town Districts, Large Town Districts, Small Town Districts, and Insular-Rural Districts the female rate exceeds that of the male, being most markedly so in the latter.

Under five years of age the difference in the mortality rate as to sexes in Scotland is not great, being 0·865 per cent. for the male and 0·932 per cent. for the female, exceeded in both the Principal and Large Town Districts. In the Principal Town Districts, Large Town Districts, Small Town Districts, and Insular-Rural Districts, the female death-rate is above that of the male.

During the complete first quinquennial period of life (0–5 years), the male mortality rate for Scotland is 4·520 per cent., the female 4·026 per cent., while during the following five years (5–10) it falls in the case of the former to 0·541 per cent.; and of the latter to 0·585 per cent; ratios which are exceeded in the case of both sexes in the Principal Town Districts, and of the female alone in the Large Town Districts; and in each district the female exceeds the male rate. Between 10–15 years the death-rate is at its lowest, being in the case of all Scotland 0·380 per cent. for males, and 0·424 per cent. for females, over-topped generally in the Urban Districts, and in each, except the Principal Town Districts, the female rate is above that of the male. From 15–20 years the death-rates have again approached those occurring in the second quinquennial life period (5–10 years), and again the female rate generally exceeds the male, except in the Principal Town Districts and those of the Insular-Rural. After this the rate steadily increases, and almost without exception that in the Principal and Large Town Districts exceeds the same for Scotland, the reverse holding good in the Small Town and both Rural Districts. Between 20 and 40 years of age the female rate is higher than that of the male in the Urban Districts, and generally lower in the two Rural Districts. After 40 years the male death-rate is almost always higher than the female, the chief exception being in the Insular-Rural Districts, where, after 50 years of age, the female rate is higher than the male.

TABLE XXIII.—Ages of Males and Females who died in Scotland, and in each of its Groups of Districts, during the Year 1888.

At all ages the death-rate for Scotland, as seen on the lowest line of Table XXIV., is in the case of the males 179 per ten thousand estimated to be alive, and of the females 174. In the Principal Town Districts the rate among the males is 199 per ten thousand, and among the females 185; in the Large Town Districts the male rate is 187, and the female 185; in the Small Town Districts the male rate is 167, and the female 168; in the Mainland-Rural Districts the male rate is 156, and the female 158; and in the Insular-Rural Districts the male rate is 151, and the female 167 in every ten thousand of their respective populations.

Table XXVII. affords similar information as to the Principal Towns themselves; thus in Glasgow in every hundred infants presumed to be alive at the middle of the year, 15·64 died; in Dundee the mortality was 15·61; in Kilmarnock 13·26; in Edinburgh 13·22; in Aberdeen 12·79; in Leith 11·58; in Paisley 11·40; in Perth 9·71; in Glasgow, Landward and Suburban, 9·38; and in Greenock 9·27. During the second year of life Paisley is first, with 12·80 per cent. of deaths among children of that age; followed by Glasgow, with 8·41 per cent.; Greenock, with 5·56 per cent.; Edinburgh, with 5·12 per cent.; Glasgow, Landward and Suburban, with 5·08 per cent.; Kilmarnock, with 5·07 per cent.; Dundee, with 4·94 per cent.; Leith, with 4·79 per cent.; Aberdeen, with 3·91 per cent.; and Perth, with 3·68 per cent. At all ages under 5 years a death-rate of 8·17 per cent. is indicated in Paisley, followed by Glasgow with one of 6·59 per cent., Dundee, with 5·27 per cent.; Edinburgh, with 4·91 per cent.; Kilmarnock, 4·76 per cent.; Greenock, 4·25 per cent.; Leith, 4·23 per cent.; Aberdeen, 4·18 per cent.; Glasgow, Landward and Suburban, 3·91 per cent.; and Perth, 3·66 per cent.

Table XXV. shows the death-rate at similar ages as the above, but now calculated to the total deaths. Thus for Scotland in every 100 deaths among the males 22·22 of them occurred to infants during the first year of

life, and 17·05 to female infants. Those figures are exceeded in the Principal and Large Town Districts in the case of both sexes, and of the males in the Small Town Districts, being lowest in the Insular-Rural Districts, viz., 12·74 and 8·66 respectively. Between 0–5 years 36·34 per cent. of the total male deaths occur in Scotland and 30·07 per cent. of the female, exceeded as to both sexes in the Principal and Large Town Districts, the reverse holding in the other registration districts. At ages 70 and over, while 15·79 per cent. of the male exits throughout Scotland are registered, 20·81 per cent. is the proportion among the females, ratios much exceeded in the case of both sexes in the Small Town and both Rural Districts.

The death-rate per ten thousand of the estimated populations of the undernoted European States is during the year 1888 as follows:—Austria 292, Italy 268, German Empire, 238, Prussia 230, France 218, The Netherlands 204, Belgium 201, Switzerland 199, Denmark 197, and Norway 169.

CAUSES OF DEATH.

During the year under review there were registered in Scotland 71,174 deaths, but in the case of 755 the cause was ill-defined, or so specified as to be of no use for such statistical purposes as the present.

The death-rate for the country as a whole in every hundred thousand of its population as estimated, and for the sexes combined, is 1764, lower considerably than that for last year; the rate for the males is 1786, and for the females 1744. These proportions are exceeded in the Principal and Large Town Districts; in the case of the other three the rates are below that for the country as a whole. It is highest in the Principal Town

Districts, viz., 1921 for both sexes, lowest in the Mainland-Rural Districts, 1575.

Diseases of a Zymotic character caused during the year 7974 deaths, which is 2845 fewer than for last year, and is in the proportion of 200 in each hundred thousand of the population, or 11·32 per cent. of the total specified deaths were of this nature. From Tables XXVIII. and XXIX. it is seen

TABLE XXV*a*.—Percentage of Deaths at each Age to the Total Deaths in Scotland, for the ten years 1878–87, and the mean of the same. Also the percentage for 1888.

that in the Principal and Large Town Districts this proportion is exceeded, and that the female rate is above that of the opposite sex.

Table XXXII. shows the number and proportion of deaths from the chief Zymotics and from some other diseases, occurring at five different periods of life. Thus of the whole 7974 deaths from Zymotics at all ages, 5310 died during the first five years of life, 717 between 5 and 10 years, 251 between 10 and 15 years, 1246 at ages between 15 and 60 years, and 450 at ages above this; or in other words, in every 100 such deaths 66·6 were registered as occurring during the first five years of life, 9·0 during the next quinquennial period, and 3·1 during the following, 15·6 between 15 and 60 years, and 5·7 at ages over 60 years, so that during the present year 78·7 per cent. of the total mortality from such affections occurred during the first fifteen years of life.

From Table XXXIII. it is seen how of the total mortality throughout Scotland, 22·35 per cent. of the deaths registered as occurring at ages under 15 years are due to Zymotics, 3·94 being the percentage of the same at ages over 15 years.

Hooping-Cough, as usual, heads the list, 1722 deaths in all being ascribed to it. Of these 1634 or 94·9 per cent. died during the first five years of life, 81 or 4·7 per cent. during the succeeding quinquennial period, 5 of the 7 remaining occurring between 10 and 15 years, the other 2 at ages over this. Measles stands next with 1406 deaths, 1285 or 91·4 percent. of them succumbing during the first five years of life, 85 or 6·0 per cent. between 5 and 10 years, 15 between 10 and 15 years, and 21 between 15 and 60 years. Diarrhœal affections caused 1307 exits, 852 or 65·2 per cent. during 0 to 5 years, 35 or 2·7 per cent. between 5 and 10 years, 12 or 0·9 per cent. between 10 and 15 years, 154 or 11·8 per cent. between 15 and 60 years, and 254 or 19·4 per cent. at greater ages than this last. Diphtheria is the cause of 872 exits, 566 or 64·9 per cent. of them during the first five years

of life, 208 or 23·9 per cent. between 5 and 10 years, 48 or 5·5 per cent. between 10 and 15 years, as also between 15 and 60 years, and 2 occurring at greater ages than 60. Fevers caused 837 deaths, the largest number of them, 476 or 56·9 per cent., between 15 and 60 years. Typhoid or Enteric caused the greatest number of such deaths, 665, being thus ascribed, 373, more than half of them, or 56·1 per cent., being between 15 and 60 years, 77 or 11·6 per cent. died during the first five years of life, 100 or 15·0 per cent. between 5 and 10 years, 89 or 13·4 per cent. between 10 and 15 years, and 26 or 3·9 per cent. at ages over 60 years. Typhus caused 102 deaths, the larger number, 91, or 89·2 per cent. of them, at ages over 15 years. To Fevers of a simple or ill-defined nature 58 deaths are placed, and there were 6 fatal cases of Relapsing and of Cerebro-spinal Fever registered during the year. Scarlet Fever caused 732 deaths, 476, or 65·0 per cent. of them, during 0 to 5 years of life, 175 or 23·9 per cent. between 5 and 10 years, 54 or 7·4 per cent. between 10 and 15 years, and 27 or 3·7 per cent. between 15 and 60 years. Puerperal Fever caused 309 deaths. Erysipelas caused 289 deaths, 120 or 41·5 per cent. between 0 and 5 years, 73 or 25·3 per cent. between 15 and 60 years, 91 or 31·5 per cent. above 60 years, the remaining 5 occurring between 5 and 15 years. Syphilis caused 229 deaths, 199 or 86·9 per cent. of them being between 0 and 5 years, and 30 or 13·1 per cent. at ages over 15 years.

The mortality rate from Zymotics in Scotland is in the proportion of 200 in every hundred thousand of the estimated population, or they cause 11·32 per cent. of the total specified deaths. In the Principal Town Districts the rate is 241 per hundred thousand of the population, or 12·55 per cent. of the specified deaths; in the Large Town Districts the rate is 230 per hundred thousand population, or 12·35 per cent. of the deaths; in the Small Town Districts it is 193 to population, or 11·52 per cent. of the deaths; in the Mainland-Rural Districts it is 136 per hundred thousand, or 8·61 per cent. of deaths; and in the Insular-Rural Districts 128 per hundred thousand of population, or 8·05 per cent. of the total deaths. Information

TABLE XXVII.—Percentage of Deaths to the Population at each Age in the Principal Towns of Scotland in 1888.

In Edinburgh the proportion is 177 per hundred thousand of population, or 9·81 per cent. of all deaths. Of these 41 are due to Measles, 29 to Diarrhoeal affections, 26 to Hooping-Cough, 25 to Diphtheria, 15 to All Fevers (12 Enteric and 2 Typhus).

Dundee exhibits a ratio of 175 deaths from Zymotics in every hundred thousand of population, or 9·51 per cent. of all. Diarrhœal Affections cause 65 of the above, Scarlet-Fever 24, Diphtheria 16, All Fevers 15 (12 Enteric and 3 Typhus), Measles 12, and Hooping-Cough 11.

In Aberdeen 164 deaths from the like diseases is the proportion in every hundred thousand of population, or 8·97 per cent. of the total mortality is caused by Zymotics; 58 of these are Hooping-Cough, 47 Diarrhœal Affections, 14 All Fevers (12 Enteric and almost 3 Typhus), 8 Diphtheria, 5 Scarlet-Fever, and 1 Measles.

In Greenock 208 deaths in every hundred thousand of the inhabitants

are due to Zymotics, or 13·03 per cent. of all. Measles caused 59 of the above, Diphtheria 36, Diarrhœa and Dysentery 34, Hooping-Cough and All Fevers, each 21 (10 Enteric and 10 Typhus), and Scarlet-Fever 20.

In Leith the mortality from the same is 193 per hundred thousand of population, or 12·22 per cent. of all the deaths, 57 of the above proportion being ascribed to Measles, 36 to Hooping-Cough, 20 to Diarrhœal Affections and All Fevers (Enteric 18, Typhus 3), 18 to Diphtheria, and 11 to Scarlet-Fever.

In Paisley the proportion is 573 deaths from Zymotics in every hundred thousand of the inhabitants as estimated, or 22·20 per cent. of the total deaths are of this nature. 296 of these are ascribed to Measles, 65 to Diarrhœal Affections, 57 to Hooping-Cough, 55 to All Fevers (36 Typhoid and 16 Typhus), 39 to Diphtheria, and 18 to Scarlet-Fever.

In Perth 179 is the proportion as above in which deaths occurred from Zymotics, equivalent to 9·88 per cent. of the total mortality. 59 come under Scarlet-Fever, 25 under All Fevers (Enteric 22, Typhus 3), 22 under

Diphtheria, 19 under Diarrhœa and Dysentery, 15 under Measles, and 6 under Hooping-Cough.

Kilmarnock exhibits a rate of 382 per hundred thousand of population, or 18·41 per cent. of all the deaths are due to Zymotics. 103 of those are from Scarlet-Fever, 92 from Diarrhœa and Dysentery, 51 from Hooping-Cough, 47 from Measles, 33 from All Fevers (29 being Enteric), and 18 from Diphtheria.

In Glasgow Landward and Suburban 219 in every hundred thousand of the population died from one or other of the Zymotics, or 14·36 per cent. of the total deaths were of this nature. Of those 58 are Hooping-Cough, 35 Measles, 32 Diphtheria, 29 Diarrhœa and Dysentery, 23 Scarlet-Fever, 16 All Fevers (10 Enteric and 4 Typhus).

There were but 3 fatal cases of Small Pox registered throughout Scotland during the year—2 males and 1 female—viz., a male æt. 27 years in Fife, a male æt. 9 months in Lanark, and a female æt. 17 years in Aberdeen.

Measles caused 1406 deaths in Scotland, being in the proportion of 35 in every hundred thousand of the population, or 2·00 per cent. of the total specified deaths; 741 of them are males and 665 females. This disease was most marked in the Large Town Districts, where the death-rate was in the ratio of 51 in every hundred thousand of the inhabitants, or 2·74 per cent. of the total deaths were due to it. The lowest rate is in the Mainland-Rural Districts, where it is 15 per hundred thousand.

Scarlet-Fever caused 732 deaths, or 18 in every hundred thousand of the population of the country, and equal to 1·04 per cent. of the total deaths; the males number 367, the females 365. The mortality from this disease was highest in the Principal and Large Town Districts, being 24 in

the former and 21 in the latter per hundred thousand of their respective populations, and lowest in the Insular-Rural Districts, where it is 7.

To Hooping-Cough 1722 deaths are ascribed, equal to 43 in every hundred thousand of population, or 2·45 per cent. of the specified deaths. Male exits are 758, female 964. The mortality from Hooping-Cough was most pronounced in the Principal and Large Town Districts, being in each 52, and lowest in the Mainland-Rural Districts, where it is 27 per hundred thousand of their populations. In the Large Town Districts the rate of the female deaths was 63, and males 40, in every hundred thousand of each sex presumably alive; the male deaths here numbering 88, the female 143. Diphtheria is the cause of 872 deaths, equal to 22 in every hundred thousand of the inhabitants, and forming 1·24 per cent. of the total rate. Males 404, females 468. The heaviest mortality occurs in the Principal

Town Districts, 27, and the lowest in the Insular-Rural Districts, 5 per hundred thousand of population.

Continued Fevers caused 837 deaths, which is at the rate of 21 in every hundred thousand of population throughout Scotland, or they formed 1·19 per cent. of the certified deaths; the males number 379, and the females 440. The highest proportion of deaths from these occurred in the Small Town and Insular-Rural Districts, in the former at the rate of 25, and in the latter of 22 in every hundred thousand of their respective populations. Typhus caused 102 deaths or 3 in every hundred thousand of population. Typhoid caused 665 deaths, males 305, females 360, equal to a rate of 17 per hundred thousand of population, and most marked in the Small Town and Mainland-Rural Districts. Table XXXVII. indicates how 194 deaths from Typhoid occurred in the Rural Districts, amounting to 84·72 per cent. of the total deaths from Continued Fevers there registered, in the Urban Districts the number of deaths being 471 and the proportion 77·47 per cent. From Typhus 17 deaths, or 7·42 per cent. of the total, occurred in the Rural Districts, the number in the Urban being 85, and the percentage 13·98. Diarrhœa and Dysentery caused 1307 deaths, equal to 33 in every hundred thousand of population, and 1·86 per cent. of all the deaths, males numbering 663, females 644. Such affections were most marked in the three Urban Districts, where 1094 of the whole occurred, forming in the Principal Town Districts a rate of 41 in every hundred thousand of the inhabitants, in the Large Town Districts one of 37, and in the Small Town Districts one of 34. In the Insular-Rural Districts the corresponding rate is only 9. Of the whole number 852 are registered as occurring during the first five years of life.

Cancer is the ascribed cause of 2450 deaths, equal to 61 in every hundred thousand of the population of the country, and 3·48 per cent. of the total mortality,—male deaths 902, female 1548. The mortality from this cause did not vary much in the various districts, but is somewhat higher in the Rural Districts than in the others, when the ratio of deaths from this disease is compared with the total deaths. From Tables XXX. and XXXI. it is seen how the inhabitants of Edinburgh and Kilmarnock have apparently suffered more in this respect than in any other of the Principal Towns. The proportion of deaths in every hundred thousand of the populations of the Principal Towns being 107 in Edinburgh, 99 in Kilmarnock, 67 in Aberdeen, 63 in Dundee, 62 in Perth, 59 in Leith, 55 in Glasgow and in Greenock, 44 in Paisley, and 39 in Landward and Suburban of Glasgow.

To Diseases of a Tubercular nature 9725 deaths are credited, being at the rate of 243 in every hundred thousand of the population, and forming 13·81 per cent. of the total mortality of Scotland for the year,—male deaths 4664, female 5061. Deaths of this nature bulk most largely in the Principal and Large Town Districts, in the former of which they are at the rate of 286 per hundred thousand of the population, or 14·88 per cent. of all the deaths, and in the latter 260 and 13·93 per cent. respectively. In the Small Town Districts the rate is 231 to population as above, in the Mainland Rural Districts it is 187, and in the Insular-Rural Districts 190. Phthisis, or Consumption, causes by far the greatest number of deaths of this character, accounting for 7044 altogether, or equal to 176 in every hundred thousand

---

of the population, or 10·00 per cent. of the total deaths. The male deaths from Consumption are 3264, and the female 3780.

The death-rate from Phthisis is high in each district, being 204 per hundred thousand of the population in the Principal Town Districts, 192 in the Large Town Districts, 165 in the Small Town Districts, 138 in the Mainland-Rural Districts, and 160 in the Insular-Rural Districts. Of the male deaths from Phthisis in Scotland 372 died under 15 years of age, 2251 between 15 and 45 years, and 641 at ages over this, the corresponding numbers among the females being 525 under 15 years, 2699 between 15 and 45 years, and 556 over 45 years; in other words, 11·4 in every 100 of the male deaths from Consumption occurred during the first 15 years of life, 69·0 between 15 and 45 years, and 19·6 at ages over this, the corresponding percentages among the females being 13·9, 71·4 and 14·7. Among the Principal Towns the highest death-rate from Phthisis is in Glasgow, where 246 lives in every hundred thousand of its estimated population succumbed to this fell disease, followed by Paisley, where 221 is the proportion; Dundee, with 204; Kilmarnock, with 202; Edinburgh, with 185; Leith, with 173; Glasgow Landward and Suburban, with 172; Aberdeen, with 166; Greenock, with 165; and Perth, with 163. Tabes Mesenterica caused 849 deaths—males 442, females 407; Tubercular Meningitis 1186, —males 628, females 558; and Scrofula 646—males 330, females 316.

From Diseases of the Nervous System 8549 deaths occurred, equal to 214 in every hundred thousand of population, or 12·14 per cent. of all the deaths—males 4325, females 4224. The Principal and Large Town Districts present the heaviest comparative mortality from such, the rate per hundred thousand of population in the former being 232, and in the latter 233. Apoplexy is the stated cause of 2287 deaths from diseases of this character, males 1080, females 1207. Under Paralysis come 1880, of which 833 are of the male, and 1047 of the female sex. Among the Towns, Diseases of the Brain, &c., cause the largest death-rate in Paisley, viz., 284 for every hundred thousand of the population, followed by Glasgow, with 268; Aberdeen, with 247; Kilmarnock, with 228; Perth, with 225; Dundee, with 222; Greenock, with 221; Edinburgh, with 205; Glasgow, Landward and Suburban, with 195; and Leith, with 158.

To Diseases of the Heart and Circulatory System 6333 deaths are registered, equal to a mortality rate of 159 in every hundred thousand of

ALL FEVERS	229	100·00	608	100·00

the population, and forming 8·99 per cent. of the total mortality; the males number 2978, and the females 3355. In the Principal Town Districts the rate to population as above from such affections was 166, and 8·66 per cent. of the deaths; in the Large Town Districts it was 159, and 8·54 per cent. of deaths; in the Small Town Districts it was 156, and 9·30 per cent. of the deaths; in the Mainland-Rural Districts it was 155, and 9·82 per cent. of the deaths; and in the Insular-Rural Districts it was 114, and 7·14 per cent. of the deaths. Among the Principal Towns the rate in Edinburgh and in Aberdeen is 212 to every hundred thousand of the respective populations, in Kilmarnock it is 202, in Perth 182, in Paisley 174, in Leith 169, in Glasgow 159, in Dundee 158, in Greenock 124, and in Glasgow Landward and Suburban 120.

To Diseases of the Respiratory Organs, not including Phthisis, there are 13,841 deaths, equal to 347 in every hundred thousand of population, or 19·66 per cent. of the total mortality in Scotland; the males number 7145, the females 6696. In the Principal Town Districts the mortality rate in every hundred thousand of the population of the same from the above is 410, or 21·35 per cent. of all the deaths; in the Large Town Districts it is 373 per hundred thousand, or 20·02 per cent. of the deaths; in the Small Town Districts it is 313 to population, or 18·72 per cent. of the deaths; in the Mainland-Rural Districts it is 274, and 17·42 per cent.; and in the Insular-Rural Districts it is 259 per hundred thousand, and 16·26 per cent. of the total deaths. Bronchitis caused 7140 exits, males 3421, females 3719. Pneumonia caused 4171 deaths; males 2352, females 1819; and Croup caused 742, males 393, females 349. Among the Principal Towns the mortality rate in Glasgow from Lung Disease as restricted is 508 in every hundred thousand of the population as estimated, and forms 22·88 per cent. of the total specified deaths therein registered; in Edinburgh the rate is 338 per hundred thousand, and 18·74 per cent. of the total deaths, in Dundee it is 465 and 25·27 per cent., in Aberdeen it is 361 and 19·79 per cent., in Greenock it is 343 and 21·50 per cent., in Leith it is 292 and 18·46 per cent., in Paisley it is 536 and 20·75 per cent., in Perth it is 364 and 20·10 per cent., in Kilmarnock it is 449 and 21·59 per cent., and in Glasgow Landward and Suburban, the rate is 289 to population, and 18·96 per cent. of the deaths.

Diseases of the Digestive System cause 4996 deaths, which is at the rate of 125 per hundred thousand of the population, and 7·09 per cent. of the total mortality—males 2456, females 2540. The three Urban Districts show a higher rate than that for the country as a whole, the Rural Districts

---

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1879–1888; specifying those from Typhus and Enteric Fever.

MONTHS.	Total Fever Deaths.	Typhus.	Enteric.	MONTHS.	Total Fever Deaths.	Typhus.	Enteric.
January .	355	82	264	July . .	254	58	179
February .	314	89	203	August .	315	74	232
March .	315	90	203	September .	390	66	308
April . .	313	88	207	October .	387	44	333

June . .	309	76	210	December .	385	80	283

indicating the reverse. In Paisley 169 in every hundred thousand presumed to be alive succumbed to diseases coming under this heading, in Glasgow the like proportion is 150, in Perth it is 148, in Aberdeen it is 131, in Edinburgh it is 126, in Dundee it is 111, in Kilmarnock it is 107, in Leith it is 101, in Glasgow, Landward and Suburban, it is 100, and in Greenock it is 83. Enteritis caused 852 deaths, Peritonitis caused 798, Hernia caused 128, Ileus and Intussusception caused 391, and Liver Disease caused 929.

Diseases of the Urinary Organs caused 1814 deaths, equal to 45 in every hundred thousand of population, or 2·58 per cent. of the total deaths, males 1110, females 704. Acute Nephritis caused 355 deaths, Bright's Disease 670, Calculus 36, Disease of Bladder and Prostate 327, and other Diseases of the Urinary Organs 277.

Disease of the Generative Organs caused 224 deaths—males 17, females 207; to Ovarian Disease 75 are due, and to Uterine Affections 132.

From Diseases attendant upon Parturition, not including Puerperal Fever, 351 deaths occur, the latter alone causing 309.

To Diseases affecting the Bones and Joints 498 deaths are due, males 291, females 207, and Diseases of the Skin and parts connected therewith are credited with 237.

To Developmental Diseases, not including Old Age, there are 2169 deaths, males 1185, females 984, of which Premature Birth accounts for 1778; Atelectasis for 118; Cyanosis, Spina Bifida, and other Congenital Defects for 273, the males being 141, and the females 132.

From Old Age 4729 persons are alleged to succumb, 1729 being men and 3000 women. The male deaths registered during the year as between 95 and 100 years are 45 in number, and the female 89, and 4 of the men and 12 of the women are stated to be 100 years or above at the time of their death, one of the men being 101 years, one 102 years, one 103 years, and one 105 years, while eleven of the women are 100 years, and one 103½ years. Eight of the above twelve females were widows.

To violence the deaths of 1819 males and 636 females are credited, together 2455, and equal to a death-rate of 62 in every hundred thousand of the population, or 3·49 per cent. of the total deaths. Fractures and Con-

---

TABLE XXXIX.—The Twenty-two most fatal Causes of Death in Scotland in 1888, arranged in the order of their fatality.

DISEASES.	Proportion of Deaths to 100,000 living.	DISEASES.	Proportion of Deaths to 100,000 living.

tusions account for 923, males 741, females 182; Burns and Scalds for 245, males 121, females 124; Drowning for 502, males 429, females 73, of which 444 are accidental and 58 suicidal. 153 males and 127 females were accidentally suffocated, and 31 males and 15 females were accidentally poisoned.

The poisons to which those deaths were accidentally due are Opium in the case of 11 males and 1 female; Chloral Hydrate, 2 males; Chloroform, 2 males and 2 females; Bromidia, 1 male; Lead, 4 males; Aconite, 1 female; Alcohol, 1 male; Carbolic Acid, 2 males and 1 female; Hydrochloric Acid, 1 male and 1 female; Sulphuric Acid, 1 male; Oxalic Acid, 1 female; Caustic Potash, 1 female; Cyanide of Potassium, 1 male; Salts of Sorrel, 1 female; Turpentine, 1 female, while in the case of 5 males and 5 females the particular form of poison is not mentioned.

Under Homicide the deaths of 7 males and 6 females are tabulated.

In Suicide 160 males and 59 females ended their lives, and that as follows: 15 males shot themselves, 36 males and 6 females died from self-inflicted Cuts or Stabs, 20 males and 13 females poisoned themselves, 39 males and 19 females drowned themselves, 38 males and 14 females hanged themselves, and in the case of 12 males and 7 females the special method had recourse to is not mentioned.

The poisons made use of to effect their purpose are Opium in the case of 11 males and 3 females, and Morphia of 2 males, Chloral Hydrate by 1 male, Strychnia by 1 male, Phosphorus by 1 female, Carbolic Acid by 2 males and 3 females, Oxalic Acid by 2 females, Salts of Sorrel by 1 female, Sulphuric Acid by 1 female, while 3 males and 2 females died by poisons self-administered, the nature of which is not mentioned.

The Suicides occurred in the five Groups of Districts as follow: 67 males and 23 females in the Principal Town Districts, 16 males and 5 females in the Large Town Districts, 32 males and 13 females in the Small Town Districts, 45 males and 16 females in the Mainland-Rural Districts, and 2 females in the Insular-Rural Districts.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1888 are extracted from the Astronomer-Royal's Notes appended to the Monthly Reports issued by the Registrar-General.

January enjoyed the characteristics of a mild, dry winter month. The mean barometric height was not so great since 1882, and the monthly range was under the average. The direction of the wind was normal or W.S.W., and its force on the square foot less by one-fourth.

The general characteristics of *February* were a high and rather steadily high barometric pressure; much north-easterly direction of the wind, but with no great force; extremely low temperature, and very little rain-fall.

March was remarkable generally for low barometric pressure, large barometric monthly range, very low mean temperature, large rain-fall (if correctly interpreted out of the depth and height of snow-fall and snow-drift), and an unusually large proportion of easterly direction in the wind.

The weather in *April* 1888 was of a nearly average and ordinary kind for the month, and, if in the matter of mean temperature, it was so much as 1°·8 below the average, that is so much less than (or about half) the

defect in that direction of the previous month of March, to its predecessors. This April was felt as a great relief after a very severe and long-continued winter.

In *May* the mean barometric pressure was close to the average,

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1888, compared with the Mean of the Ten Years 1871-1880.

accompanied, however, by greatly increased monthly range thereof, indicative of the several squally periods which characterised the weather of the month, the pressure of the wind being also above the average, and its direction rather oftener from south and west than usual.

June was quite phenomenal beyond all precedent for its large amount of east wind, and the coldness of it. For the quantity or prevalence of that direction of the wind, no June of any former year came nearer than 13 to the past June's 17; and for its coldness, no year's June since 1862 came at all near it; while even 1862 was not so low by 0°·7.

The characteristics of *July* 1888 were low barometric pressure, distressingly low mean temperature, lamentable excess of humidity, small daily range of temperature, indicating very little sunshine and overpowering rain, both in the number of its days of falling, and the depth of rain fallen; while the direction of the wind was to a most abnormal extent for the season from the East.

The chief characteristics of the Meteorology of *August* were large barometric range, low mean temperature, and small rain-fall. In other particulars the month was nearly normal.

The most remarkable features of the Meteorology of *September* were the very high barometric pressure, and small fluctuations thereof, a rain-fall less than one-third of the average, and, as was to be expected from the small barometric range, a pressure of wind little more than half the normal amount, while the mean temperature was below the average, but only to the extent of 1°.

The chief characteristics of the Meteorology of *October* were high barometric pressure, with small barometric range, a mean temperature greater than the average, and a rainfall rather less than half the average amount.

November was a wet and windy month, with high mean temperature, low barometric pressure, and a remarkably small barometric range, the latter being less than that of any November since 1876, while the direction of the wind was easterly more frequently than usual, especially in the first half of the month.

The weather of *December* was mild and calm, and on the whole, dry, with nearly an average barometric pressure, and a barometric range smaller than usual for this month.

Tables XL. and XLI. afford much information relative to the Meteorological conditions of each month of 1888, and for comparisons sake is given the average numbers deduced from the ten years' observations 1871–1880.

The low mean temperature of the last month of 1887 is continued through the three first of the year under review, which months—January, February and March—show the lowest mean thermometric readings of the year, and with this, as is usually the case, we find the highest monthly mortality, viz., 7253 deaths, or 10·19 per cent. of all in January; 6530, or 9·18 per cent. in February; and 7041, or 9·89 per cent. in March. Eight of the months give a lower mean temperature than that for the corresponding of the ten years. The four months, June, July, August, and September, have the highest mean temperature of the year, and at the same time the smallest number of deaths, viz., 5617, or 8·80 per cent. in June; 5146, or 8·31 per cent. in July; 5047, or 8·11 per cent. in August; and 4726, or 7·74 per cent. in September.

Table XLII. deals with similar matters as to eight of the Principal Towns of Scotland, where the maximum of daily deaths are 87 in January, 82 in February, 81 in March, and 77 in April; the lowest 67 in June, 60 in July, 59 in August, and 58 in September.

There was no death from Small-Pox in any of those towns during the year, and but 3, it may be remembered, in all Scotland.

TABLE XLIII.—Deaths, Temperature, and Fall of Rain in Eight of the Principal Towns of Scotland during each Week of the Year 1888; also the Proportion of Deaths to every Thousand of the Population.

No. of Week.	Week ending	Deaths.	Prop. to every 1000 of Population.	Temperature.			Rain, in inches	No. of Week.	Week ending	Deaths	Prop. to every 1000 of Population.	Temperature.			Rain in inches

Measles caused its greatest number of deaths during the first and last three months of the year. Scarlet-Fever at no time caused an excessive number of deaths, but was at its highest during January, March, November, and December. Hooping-Cough attained its maximum in January and February, and fell gradually thereafter until October, when it again showed a rise. Diphtheria was most fatal during the two first and three last months of the year. All fevers were highest during January, April, and November.

Diarrhœa, as is invariably the case, bulks most largely during the autumnal months of August, September, and October, and least so during the spring months of March and April.

Deaths from Phthisis were more frequent during the first six than during the last six months of the year, attaining their maximum during March, April, and May, their minimum occurring during August, September, and October.

TABLE XLIV.—Monthly Mortality at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1888, and Proportion at each Age in every Hundred Deaths per Month.

Diseases of the Respiratory Organs claim a number of lives during each month, and, as may be readily understood, they fall most numerously during the cold and inclement months of January, February, March, and April. The same holds good in the case of Diseases of the Circulatory Organs, and of the Brain and Nervous System.

From Old Age the largest number of deaths are registered during January (108), February (96), and March (103.)

Tables XLIV. and XLV. give the mortality as it occurs among the inhabitants of eight Principal Towns at four periods of life, viz., in childhood, during adolescence, among adults, and the aged.

From the latter Table, which is adjusted by equalizing the months to a uniform length of thirty-one days, and showing the proportionate number of deaths in each month and at each period, we find that children under five years of age died in largest proportion in January, February, and March, when the atmospheric conditions were severe, and during October, when miasmatics as a rule were causing many deaths; the minimum mortality among children being in September.

Adolescents—those aged between 5 and 20 years—died in largest numbers during February, March, and May, months when Hooping-Cough, Diphtheria, and Consumption were taking a heavy percentage out of the population at this age, the fewest deaths occurring during August, September, and October.

Adults—those between 20 and 60 years—also succumbed in greatest number during the early months of the year, among such being doubtless many breadwinners for their families, and consequently much exposed to weather and hardships, more or less severe.

In the case of Aged persons, or those over sixty years, the occurrence of mortality is much the same; the largest number of deaths among such being during January, February, March, and April, to be explained in like manner as above, only, instead of now being chiefly bread winners, many of the men, especially, had no doubt become from age incapacitated from further work, and at the same time with hearts and lungs damaged by previous exertion and exposure, succumbed during the cold and inclement winter months. July, August, and September seem to have been the most healthy months for old persons.

Among the whole inhabitants of these eight Principal Towns in Scotland the deaths during each month ranked as follows in order of frequency:—January, February, March, April, May, October and December the same, November, June, July, August and September.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.
EDINBURGH, 10*th December* 1889.

VACCINATIONS IN SCOTLAND—1888.

No. of Division, &c.	REGISTRATION GROUPS, DIVISIONS, AND COUNTIES.	Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccine Disease: On the ground of Constitutional Insusceptibility.	Insusceptible of Vaccine Disease: In respect of the Children having already had Small-pox.	Insusceptible of Vaccine Disease: On the ground of previous Successful Vaccination.	Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	Total Births for 1888.

* The actual number of Districts is 1048—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

REPORT.

TO THE MOST HON.

THE MARQUESS OF LOTHIAN, K.T.,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, *23rd December* 1891.

MY LORD,

I had the honour in 1890, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to you, as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1889, along with the usual explanation and commentary.

At the same time, my Twenty-fifth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1889).

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,

Registrar-General.

JAN 2 1964

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

Climatic conditions having much influence upon the general health and well being of a community, this report is premised with the remarks that throughout the year and over Scotland generally, there was an unusual prevalency of calms and east winds, a deficiency of south-east, south, and south-west winds, the temperature being at the same time about 1° above the mean of previous years. The rainfall was as a rule under the average, and during the greater part of the year sunshine was deficient.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1889, and their Proportion to the Population: also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.

Principal Towns above 25000 inhabitants. Large Towns above 10000 and under 25000 inhabitants. The Small Towns from 3000 to 10000 inhabitants from 1855 to 1881—but from 1881 and upwards the Small Towns have from 2000 to 10000 of population.

the year, as obtained from the summaries which were prepared by the Registrars from the figures in the enumeration books as returned at the taking of the Census on the 5th of April last (1891), and which populations although not perhaps absolutely correct, are nevertheless quite sufficient for all practical purposes and for the calculation of the tables in this report. The revised and correct numbers cannot be obtained until each enumeration book is carefully examined and the numbers abstracted therefrom for the Census staff at present occupied in this work, which necessarily requires much care and consequently time for its execution.

The total population of Scotland as estimated to the 30th of June 1889 is 3,979,406, the males alone numbering 1,923,966, and the females 2,055,440.

This population is distributed as in years gone by into five groups of Registration Districts. The Principal Town Districts with a gross population of 1,559,623, males alone 741,584 and females 818,039; the Large Town Districts in which the conjoined sexes amount to 454,329, the males alone 221,610, and the females 232,719; the Small Town Districts with a total of 830,556, males 400,229, females 430,327; the Mainland-Rural Districts with a population estimated at 1,008,188, the males being 501,385,

TABLE IV.—Percentage of Births, Deaths, and Marriages in the Five Groups of Districts of Scotland, to the Population during each of the Years 1855–1889.

and the females 506,803; and the Insular-Rural Districts with a total of 126,710, males 59,158, and females 67,552.

By means of the recent Census numbers some of the tables have been recalculated backwards from 1891 to 1881, in place of forwards from the Census populations 1871–1881, and no doubt afford more correct information than was possible, for the later years at least, of the past decennium.

TABLE V*a*.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1889, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

TOWNS.	Estimated Population, 1889.	BIRTHS.		ILLEGITIMATE BIRTHS.		DEATHS.		MARRIAGES.	
		Births.	Per cent. to Pop.	Illegit. Births.	Per cent. to Total Births.	Deaths.	Per cent. to Pop.	Marriages.	Per cent. to Pop.

SCOTLAND . .	63303	59480	122783	58230	54783	113013	5073	4697	9770	1423	10

during the year by 49,545. The number of illegitimate births registered during the year is 9770, equivalent to 7·96 per cent. of the total births, the lowest rate for many years. The male illegitimates are 5073, the female 4697.

The births are distributed as follows throughout the five Registration Districts:—in the Principal Town Districts the total amount to 51,028, of whom 26,237 are males, and 24,791 females, together giving a birth-rate of 3·27 per cent., the mean for the last ten years is 3·54 per cent.; in the Large Town Districts the total is 14,974, males 7727, females 7247, and at the rate of 3·30 per cent., the mean for the last ten years is 3·47 per cent.; in the Small Town Districts, the births number 25,989, males 13,444, females 12,545, at the rate of 3·13 per cent., the mean for the last ten years being 3·36 per cent.; in the Mainland-Rural Districts the total natal events amount to 27,786, the males 14,337, the females 13,449, or at the rate of 2·76 per cent., the mean for the last ten years being 2·95 per cent.; and in the Insular-Rural Districts they number 3006, males 1558, females 1448, or 2·37 per cent. of a birth-rate, the mean for the last ten years being 2·49 per cent.

As regards the illegitimate births alone, Tables VIII. and IX. show how they were registered in the various districts. In the Principal Town Districts they numbered 3815, or at the rate of 7·5 per cent. of the total births, the males being 1933, and the females 1883; in the Large Town Districts they are 961, or 6·4 per cent. of all, males numbering 505, females 456; in the Small Town Districts they are 1958, or 7·5 per cent. of all, males 1020, females 938; in the Mainland-Rural Districts they number 2845, or 10·2 per cent. of the total births which were registered in the same, males 1509, females 1336; and in the Insular-Rural Districts they are 191, or 6·4 per cent. of all, the males being 107, and the females 84. In other words one child in every thirteen whose births were registered in Scotland during 1889 was illegitimate; in the Principal Town Districts the proportion was likewise one in thirteen; in the Large Town Districts it was one in sixteen; in the Small Town Districts it was one in thirteen; in the Mainland-Rural Districts it was one in nine; and in the Insular-Rural Districts, one in every fifteen was of like nature.

Tables V*a*. and V*b*. give similar information as to the Principal Towns in Scotland. Thus in Dundee 10·5 per cent. of the total births were illegitimate; in Aberdeen, 9·8 per cent.; in Perth, 8·7 per cent.; in Edinburgh, 8·6

TABLE IX.—Proportion of Births in 1889. Percentage of Births to Population, and of Illegitimate to the Total Births; also the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; with the Proportion of Mothers who bare Twins and Triplets in Scotland, and its Five Groups of Districts in 1889.

per cent.; in Glasgow, 7·6 per cent.; in Paisley, 5·9 per cent.; in Greenock, 5·4 per cent.; in Leith, 5·3 per cent.; in Kilmarnock, 5·2 per cent.; and in Glasgow, Landward and Suburban, 4·5 per cent.

Table VI. indicates how the rate of illegitmacy varies in the different counties in Scotland, from 4·6 per cent. of the total births in Shetland, to 17·9 per cent. in Wigtown; Kirkcudbright following with 15·3 per cent.; Elgin with 14·7 per cent.; Dumfries with 13·5 per cent.; Nairn and Aberdeen, each with 13·2 per cent. In sixteen counties the rate is under 8·0 per cent. which is the rate for Scotland as a whole, being lowest in Fife 5·9 per cent.; Renfrew 5·4 per cent.; Ross and Cromarty 5·2 per cent.; Dumbarton 5·0 per cent.; and Shetland 4·6 per cent.

Of the total births registered throughout the year in Scotland, 63303 were of the male, and 59480 of the female sex, which is in the proportion of 106·4 of the former to every 100 of the latter. Among the legitimate births alone the ratio is as 106·3 is to 100, and among the illegitimate it is as 108·0 is to 100. In England the male births were to the female as 103·8 is to 100.

During the year 1423 of the mothers bore two, and in 10 cases three infants at a birth, so that of the total mothers bearing children during 1889, in all 121,330, one in every 85 bore twins and one in every 12,133 bore triplets at a birth.

The births were registered throughout Scotland in each month in the following proportions:—9·21 per cent. during May, 8·65 per cent. during October, 8·71 per cent. during April and July, 8·44 per cent. during January, 8·40 per cent. during March, 8·39 per cent. during June, 8·26 per cent. during December, 8·01 per cent. during August, 7·93 per cent. during September, 7·83 per cent. during November, and 7·46 per cent. during February. When the months are equalized to a similar length of 31 days, 9·04 per cent. of the births occurred during May, 8·83 per cent. during April, 8·55 per cent. during July, 8·51 per cent. during June, 8·48 per cent. during October, 8·28 per cent. during January, 8·24 per cent. during March, 8·11 per cent. during February and December, 8·05 per cent. during September, 7·94 per cent. during November, and 7·86 per cent. during August.

The birth-rate for each ten thousand of estimated population in the following European States, for the present year is—379 in Austria, 373 in

b

marriage-rate of 66·20 per ten thousand of the population as estimated. The mean average rate for the last ten years 1879–1888, is 66·5 per ten thousand. The rate for England during the present year is 73·5 per ten thousand.

The marriage-rate differs a good deal in the five Registration Districts, being 82·7 for every ten thousand of the inhabitants in the Principal Town Districts, the mean rate in the same for the last ten years being 82·1; in the Large Town Districts the present rate is 70·4 per ten thousand, the mean rate for the ten years being 67·9; in the Small Town Districts it is 60·4 per ten thousand for 1889, the mean being 61·9; in the Mainland-Rural Districts the rate is 47·3 per ten thousand, the mean rate being 51·2; and in the Insular-Rural Districts the rate for the present year is 35·5 per ten thousand of the population, the mean for the ten years 40·0 in like proportion of the inhabitants. These proportions for the present year, when compared with the corresponding for 1888, indicate an increase in each district for the present year.

From Table VI. it is readily apparent how in the counties of Scot-

land the marriage-rate differs considerably, varying from over 80 per ten thousand of the population in Lanark, to Sutherland when it is not quite 29. In six counties the rate is over that for Scotland as a whole, being 66·32 per ten thousand in Forfar, 66·37 in Linlithgow, 66·82 in Stirling, 76·36 in Edinburgh, 77·00 in Renfrew, and 80·49 in Lanark. Those counties in which the lowest marriage-rate occurs are Ross and Cromarty, with one of 39·12 per ten thousand; Argyll, with 37·95; Shetland, with 36·35; and Sutherland, with 28·67.

Table V*a*. shows the number and proportion of marriages in each of the Principal Towns of Scotland, the latter being 91·4 in every ten thousand of the estimated number of inhabitants of Glasgow, 86·2 per ten thousand of those in Edinburgh, 77·1 in Dundee, 77·0 in Aberdeen, 79·8 in Leith, 84·2 in Greenock, 86·2 in Paisley, 68·3 in Perth, 74·7 in Kilmarnock, and 66·5 in Glasgow, Landward and Suburban.

The fertility of each marriage is computed in the usual manner. The number of marriages registered during the year 1883 amounted to 26,869, and the legitimate births registered during the year now under review are

---

TABLE XII.—Proportion of Marriages, 1855–1889. Percentage of Marriages contracted in Scotland according to the Rites of the several Religious Denominations during each of the Years 1855–1889.

YEARS	PERCENTAGE of REGULAR MARRIAGES according to the Rites of the							IRREGULAR MARRIAGES

1889	44·97	19·98	11·40	10·07	3·00	7·38	0·01	3·19

113,013, so that $\frac{113013}{26869}$ gives 4·21 as the average fertility of each marriage, or 421 children were born to every 100 marriages. In England the average number of children born to each marriage was 4·10 or 410 to every 100 marriages.

Table XI. gives the number of marriages as performed by the clergy of the various denominations, as also the irregular marriages, and Table XII. gives the varying proportions of these in every 100 of the total. Thus of the whole 26,344 celebrations throughout Scotland, 11,846 were performed by clergymen of the Established Church, 5263 by those of the Free Church, 3004 by those of the United Presbyterian Church, 2653 by those of the Roman Catholic Church, 791 by those of the Episcopal Church, 1943 are by ministers of other denominations than any of the above, while in 3 cases the denomination is not stated, and 841 of the marriages were irregular. In other words 44·97 per cent. of the marriages were performed in accordance with the forms of the Established Church, 19·98 per cent. with those of the Free Church, 11·40 per cent. with those of the United Presbyterian Church, 10·07 per cent. with those of the Roman Catholic Church, 3·00 per cent. with those of the Episcopal Church, and in 7·38 per cent. the denomination was other than any of the preceding. A small fraction 0·01 per cent., indicates those in which the denomination of the officiating clergyman was omitted to be given, and 3·19 per cent. of the whole were irregular in character.

Those proportions are indicative of a slight increase in the cases of the Free Church, United Presbyterian Church, Roman Catholic Church, those of other denominations, and a further increase is observable in the case of

irregular marriages which have been steadily going up for the last ten years.

Upon making similar comparisons for the whole period since registration commenced in Scotland, *i.e.*, since 1855, it is found that of the total marriages celebrated during that period, 45·54 per cent. were solemnized under the auspices of the Established Church, 22·21 per cent. under those of the Free Church, 13·13 per cent. under those of the United Presbyterian Church, 9·29 per cent. by clergy of the Roman Catholic Church, 2·29 per cent. by those of the Episcopal Church, while 6·14 per cent. were by ministers of other denominations than the aforesaid, in 0·26 per cent. of the cases no denomination was given, and in 1·03 per cent. the marriages were irregular.

Table *Xa.* which is again given shows the number and percentage of marriages as solemnized throughout Scotland in each county, and in eight Principal Towns in accordance with the rites of each denomination. Thus in the case of the Towns, in Aberdeen and Leith over 53 per cent. of the marriages were performed by clergy of the Established Church; the lowest ratios occurring in Dundee 34·94 per cent., Greenock 34·82 per cent., Paisley 33·33 per cent., and Glasgow 32·08 per cent. The largest proportion of marriages solemnized by ministers of the Free Church occur in Edinburgh, 24·29 per cent., and Kilmarnock, 24·76 per cent.; the fewest in Glasgow, 16·65 per cent., and Leith, 14·73 per cent. Marriages in connexion with the United Presbyterian Church are in greatest proportion in Paisley, 15·14 per cent.; lowest in Greenock, 8·75 per cent., and Aberdeen, 6·12 per cent. The highest proportion of marriages performed by clergy of the Roman Catholic Church occur in Greenock; 21·61 per cent., lowest in Edinburgh, 5·74 per cent., and Aberdeen, 2·19 per cent. Episcopal Church marriages appear at their maximum rate in Dundee 7·95 per cent., Edinburgh 7·04 per cent., and at their minimum in Kilmarnock 2·43 per cent., Glasgow 2·24 per cent., and Glasgow, Landward and Suburban 2·01 per cent. Those in accordance with the procedure of other denominations are greatest in Aberdeen, 12·90 per cent.; lowest in Perth, 4·79 per cent., and Edinburgh, 4·48 per cent. Irregular marriages took place in largest proportion in Glasgow where 8·72 per cent. of the whole were of this

nature, and in Edinburgh with 6·56 per cent.; being lowest in Paisley 1·80 per cent., and in Kilmarnock 0·48 per cent.

In nineteen counties 50·00 per cent. or over of the marriages fall under Established Church, being highest in Argyll, with 60·60 per cent., Aberdeen, with 60·85 per cent., Dumfries with 61·92 per cent., Haddington with 63·96 per cent., Kirkcudbright with 64·02 per cent., Wigtown with 66·87 per cent., Kincardine with 71·65 per cent., and Shetland with 75·23 per cent.; the smallest proportions being in Inverness, 31·05 per cent., Caithness 30·72 per cent., and Sutherland 21·31 per cent. In the case of the Free Church in four counties the rate is over 50·00 per cent., Inverness with 52·89 per cent., Caithness with 60·24 per cent., Ross and Cromarty 75·97 per cent., and Sutherland 78·69 per cent.; the lowest occurring in Linlithgow 13·70 per cent., Kinross 12·82 per cent., Selkirk 12·35 per cent., and Clackmannan 11·26 per cent. In two counties the United Presbyterian Church is not represented, Caithness and Sutherland; the highest proportion of marriages in connexion with this denomination occurs in Kinross 30·77 per cent., and Peebles 32·18 per cent.; the fewest in Kincardine 2·06 per cent., and Inverness 0·79 per cent. No marriages are registered as performed by clergy of the Roman Catholic Church in Shetland, Orkney, Sutherland, Ross and Cromarty, Kinross and Berwick during the year; while the greatest ratio of them occurred in Linlithgow 17·20 per cent., Renfrew 20·10 per cent., and Dumbarton 20·72 per cent., the lowest is in Aberdeen 1·75 per cent., Kincardine 1·55 per cent., Peebles 1·15 per cent. and Caithness 0·60 per cent. Those in accordance with the Episcopal Church are greatest in Edinburgh 6·07 per cent., in Forfar 6·56 per cent., and Kincardine 7·22 per cent.; fewest in Linlithgow 0·88 per cent., Elgin 0·85 per cent., Ross and Cromarty 0·65 per cent., and Fife 0·53 per cent.; there being none in Shetland, Orkney, Sutherland, Nairn, Kinross, Bute or Peebles. Celebrations in connexion with other denominations are greatest in Aberdeen 9·10 per cent., Renfrew 9·24 per cent., Nairn 9·52 per cent., Orkney 9·72 per cent., and Lanark 10·30 per cent.; lowest in Inverness 1·58 per cent., Ross and Cromarty 1·30 per cent., and Haddington 1·02 per cent. Marriages of an irregular character are most prominent in Edinburgh 4·89 per cent., in Lanark 5·86 per cent., and Banff 6·52 per cent.; least so in Ayr 0·42 per cent., Dumbarton 0·36 per cent., and Argyll 0·33 per cent.; there being none in

Shetland, Sutherland, Ross and Cromarty, Inverness, Nairn, Kincardine, Kinross, Bute, Haddington, Berwick, Selkirk, Roxburgh and Kirkcudbright.

But three of the 26,344 men married during the year failed to state their age on this occasion, all the wives stating theirs. 1632 or 6·20 per cent. of the bridegrooms were under 21 years of age at marriage, 5154 or 19·56 per cent. of the brides being the same. One girl was married who had not attained the age of 16 years, and nineteen of the husbands were still under 18 years of age, while twenty-seven of the men and two of the women were 70 years or over.

Table XIV. indicates the proportion of men and women who married at different ages during the year. Thus in Scotland while but 2·45 in every 100 men married at ages under 20 years, 11·42 women did the same, ratios exceeded in the case of the men in the Principal Town Districts, and in that of the women in the same, as also in the Large Town Districts. At ages between 20–25 years, 35·54 per cent. of the husbands married, 45·02 being the corresponding percentage in the case of the wives, ratios exceeded in the case of the former in each of the Town Districts, and in that of the latter in the Large and Small Town Districts only. 32·39 per cent. of the men were between 25 and 30 years of age at marriage, 25·57 per cent. of the

women being the same, ratios exceeded in the case of the husbands in the Small Town Districts, and of both spouses in the two Rural Districts. Between 30 and 35 years of age 14·12 in every 100 of the men married, 9·07 of the women at corresponding ages doing likewise, ratios in both cases now only exceeded in the Rural Districts. But 6·63 per cent. of the men married and 4·35 per cent. of the women, had reached the age 30 to 40 years, the greatest proportion of both sexes so doing at this age being in the Insular-Rural Districts. After this age as usual the percentage of those who marry rapidly falls and that in all the Districts.

The number of bachelors who married spinsters during the year is 22,621, while 724 bachelors espoused widows, 2176 widowers mated with spinsters, and 808 widowers united themselves with widows; in other words 85·87 per cent. of the marriages were between bachelors and spinsters, 2·75 per cent. between bachelors and widows, 8·26 per cent. between widowers and spinsters, and 3·06 per cent. between widowers and widows.

Table XVIII. gives the proportion of the husbands and wives who signed the marriage registers, or who adhibited their "mark" in lieu thereof. Thus in Scotland 95·70 per cent. of the men and 92·62 per cent. of the

"mark" only. In the Principal Town Districts 95·71 per cent. of the husbands, and 92·16 per cent. of the wives signed their names, in the Large Town Districts the proportions were respectively 94·59 per cent. and 91·62 per cent., in the Small Town Districts they were 95·38 per cent. and 92·71 per cent., in the Mainland-Rural Districts they were 97·74 per cent. and 96·67 per cent., in the Insular-Rural Districts 85·33 per cent. of the men and 69·11 per cent. of the women signing, leaving 14·67 per cent. of the former, and 30·89 per cent. of the latter, who simply made their "mark."

In the counties, 11·48 per cent. of the bridegrooms in Sutherland, and 24·59 per cent. of the brides did not write their names, in Inverness the corresponding ratios were 13·16 per cent. and 25·26 per cent., while in Ross and Cromarty 17·21 per cent. of the husbands and 41·23 per cent. of the wives made use of their "mark." In Kinross every person married during the year signed his or her name on the occasion, and in Peebles, Selkirk and Roxburgh, all the husbands did likewise but a small proportion of their spouses failing to follow their example.

Of the two chief cities in Scotland it is shown at the foot of the table, that in Edinburgh 98·55 per cent. of the husbands, and 97·42 per cent. of the wives signed the registers at marriage, leaving 1·45 per cent. of the former, and 2·58 per cent. of the latter to adhibit their "mark," the corresponding ratios for Glasgow being 94·39 per cent. and 89·41 per cent. for signature, leaving 5·61 per cent. and 10·59 per cent. for affixing of "mark."

13·51 per cent. of the marriages were registered during June, 12·40 per cent. during January, 12·08 per cent. during December, 11·17 per cent. during July, 8·81 per cent. during November, 7·39 per cent. during April, 6·64 per cent. during September, 6·46 per cent. during October, 5·97 per cent. during March, 5·96 per cent. during August, 5·64 per cent. during February, and 3·97 per cent. during May.

The proportion of marriages per ten thousand of the population in the following European States during 1889 was—82 in Prussia, 80 in the German Empire, 75 in Austria and Italy, 72 in Belgium, 71 in Denmark and in France, 70 in Switzerland, 69 in the Netherlands, and 62 in Norway.

DEATHS.

During the year 73,238 deaths were duly registered throughout Scotland, 36,328 of those being males, and 36,910 females, which gives a mortality rate of 184 in every ten thousand of the population as estimated, or one death in every 54 of the inhabitants. This is a higher rate than for last year, which was as corrected from the late Census numbers 180 per ten thousand. The death-rate among the males alone for the present year is 189, and among the females 180 in every ten thousand respectively. The mean death-rate for the last ten years is 194 per ten thousand of the population of the country.

On regarding the rate of mortality in each of the five Great Registration Districts into which the whole country is divided, it is seen that in the Principal Town Districts 32,436 deaths were registered, being at the rate of 208 in every ten thousand of the inhabitants of the same, the male deaths numbering 16,046, and the female 16,390; in the Large Town Districts the deaths are 8462, equal to 186 in each ten thousand of the population, the males 4259, the females 4203; in the Small Town Districts the total amount

to 14,613, or in the ratio of 176 per ten thousand of the population, the male deaths numbering 7067, and the female 7546; in the Mainland-Rural Districts the total is 15,863, equal to 157 per ten thousand of the inhabitants of the same, the males 8012, and the females 7851; and in the Insular-Rural Districts they number collectively 1864, being in the proportion of 147 in every ten thousand of the inhabitants, the male deaths alone being 944, and the female 920. The rate is thus considerably higher in the Urban Districts where it is in the proportion of 195 deaths in every ten thousand of the population than in the Rural Districts where it is 156. Table XX. also shows the death-rate in the case of both sexes in the Principal Town Districts, and in that of the females alone in the Large Town Districts to be above that of Scotland as a whole.

Tables XXI. and XXII. give the deaths and porportionate mortality of the same in each of the Principal Towns of Scotland. Thus in Glasgow the deaths number 13,139, which is at the rate of 23·6 per thousand of the population as estimated; in Edinburgh the deaths are 4815, the corresponding rate being 18·8 per thousand; in Dundee the deaths are 2984, the rate 19·5 per thousand; in Aberdeen they are 2287, being at the rate of 19·2 per thousand; in Leith they amount to 1352, a rate of 20·4 per thousand; in Greenock the deaths are 1386, the rate 21·1 per thousand; in

Paisley they are 1359, the rate being as in the last 21·1 per thousand; in Perth the deaths number 584, a rate of 19·1 per thousand; in Kilmarnock they amount to 588, the rate being 21·3 per thousand; and in Glasgow, Landward and Suburban, the deaths number 3942, the mortality rate being 18·2 per thousand.

Tables XXIII. and XXIV. show the number of male and female deaths and the corresponding proportions of the same to the population as estimated at each age at a series of years for Scotland and its five Primary Registration Districts. Thus we find that 14·138 per cent. of all the male infants presumably alive under one year of age died during 1889, the corresponding rate among the females being 11·323, these ratios are exceeded in the case of both sexes in the Principal and Large Town Districts, to the greatest degree in the former where 16·635 per cent. of the males, and 13·751 per cent. of the females succumb at this earliest age. The mortality rate gradually falls in the Small Town and Rural Districts, being lowest in those of the Insular-Rural where the male death-rate under one year is 8·207 per cent. and the female 5·803 per cent. In all the Districts the male rate is greater than the female.

Under two years of age the death-rate has fallen to 5·639 per cent. in the case of the males and 5·437 per cent. in that of the females. These are exceeded in the case of both sexes in the Principal Town Districts,

and in that of the males alone in the Large Town Districts. In the Mainland Rural Districts the female death-rate at this age is higher than the male; the lowest rate is found in the Insular-Rural Districts.

Under three years of age, the death-rate for both sexes throughout Scotland is nearly the same, being in the case of the male children 2·184 per cent., and of the female 2·241 per cent., ratios alone exceeded in the Principal Town Districts and for both sexes. The rate falls throughout the other Districts, being again lowest in the Insular-Rural Districts, and in all, except in the Principal Town Districts, the female mortality rate is higher than the male.

Under four years of age, the death-rate for the country as a whole is for the males 1·339 per cent. and for the females 1·447 per cent., proportions again exceeded in the Principal Town Districts, where they are 1·900 per cent. and 2·106 per cent. respectively. At this age in each Urban District the female rate is above that of the male, the reverse holding in the two Rural Districts.

Under five years of age the mortality rate had fallen throughout the country to 1·001 per cent. in the case of the male, and 1·061 per cent. of the female children estimated to be alive at that age. This rate is exceeded

in both sexes in the Principal and Large Town Districts, and in all the Districts the female rate is above that of the male.

During the undivided first five years of life, the male death-rate is 5·017 per cent., and the female 4·423 per cent. of the children presumed to be alive during the same period in Scotland, while during the following quinquennial period they have fallen to 0·540 per cent. and 0·584 per cent. respectively, proportions which are somewhat exceeded in the Principal Town Districts. Between 10–15 years the percentage of deaths throughout Scotland is at a minimum, being in the case of the males 0·370, and of the females 0·404, rates which are exceeded in the case of both sexes in the Principal Town Districts, and of the females alone in the Large and Small Town Districts. In the Rural Districts the male rate is rather higher than that of the female. Between 15–20 years—and after—the rate again rises, being at this age in the case of males in Scotland 0·583 per cent., and of the females 0·618 per cent., exceeded in the case of both sexes in the Principal Town Districts, of the males alone in the Insular-Rural Districts, and of the females in the Large and Small Town Districts. Between 20–30 years the proportional mortality was greater in the Small Town Districts in the case of both sexes, in the Insular-Rural Districts in that of the males, and in the Principal Town Districts and Large Town Districts in that of the females than for Scotland, and in the Rural Districts the female rate was under that of the male. Between 30–40 years, in the Principal and Large Town Districts the rate for both sexes is above that for Scotland, and in the Small Town Districts the female rate is above the male. At ages over 40, the death-rate more rapidly increases for the whole country and each of its divisions, and in almost all cases the male rate exceeds that of the female. Taking the proportion of deaths male and female as a whole at all periods of life, we find that for Scotland in every ten thousand of the estimated population 189 males, and 180 females died during the

year. In the Principal Town Districts the ratio of male deaths was 217 per ten thousand of the inhabitants of the same, and of the female 201; in the Large Town Districts the male rate was 191, and the female 180; in the Small Town Districts the male rate was 177, the female 175; in the Mainland-Rural Districts the male rate was 160, the female 155; and in the Insular-Rural Districts the male rate was 160, the female 136.

Table XXVII. refers to the Principal Towns of Scotland, from which it is seen the infantile mortality rate is highest in Glasgow, where in every hundred under 1 year of age 17·40 died during the year, followed by Paisley with 16·36 per hundred, Leith with 16·00, Dundee with 15·53, Kilmarnock with 14·74, Greenock with 13·86, Edinburgh with 13·85, Aberdeen with 13·77, Glasgow, Landward and Suburban, with 12·00, and Perth with 11·14. During the second year of life Glasgow again stands first with a mortality rate of 11·04 per cent., followed by Paisley with one of 8·23 per cent., Greenock with one of 7·63 per cent., Leith 7·43 per cent., Dundee 6·91 per cent., Kilmarnock 6·56 per cent., Glasgow, Landward and Suburban, 6·35 per cent., Aberdeen 5·79 per cent., Edinburgh 5·75 per cent., and Perth 3·78 per cent. At all ages under 5 years, a death-rate of 7·88 per cent. is indicated in Glasgow, 6·45 per cent. in Paisley, 6·12 per cent. in Leith, 5·75 per cent. in Greenock, 5·74 per cent. in Dundee, 5·65 per cent. in Kilmarnock, 5·22 per cent. in Edinburgh, 5·01 per cent. in Aberdeen, 4·91 per cent. in Glasgow, Landward and Suburban, and 3·86 per cent. in Perth.

From Table XXV. information of a somewhat similar character may be obtained, but in this case the mortality at each age is compared with the total deaths at all ages. In Scotland in every hundred male deaths 23·03 were under 1 year of age, while 17·69 is the corresponding proportion among females, ratios which are exceeded in the case of both sexes in the Principal and Large Town Districts, and among the females in the Small Town Districts; the minimum rate 13·24 per cent. for the males, and 8·91

Total.	1·888	1·796	2·168	2·006	1·911	1·797	1·766	1·754	1·598	1·549	1·596	1·362

per cent. for the females, being found in the Insular-Rural Districts. At almost all ages up to 60 years, the percentage of deaths at each age as compared with the total deaths is less in the Rural Districts than in the Urban, after which age however the reverse holds, a higher proportionate mortality being found to occur in the former than in the latter Districts, but owing to the smaller numbers here dealt with is probably not so correct and important, as for the earlier years.

The death-rate per ten thousand of the estimated population of the under-noted European States is during the year 1889 as follows:—273 in Austria, 249 in Italy, 238 in the German Empire, 232 in Prussia, 205 in France, 201 in the Netherlands, 191 in Belgium, 186 in Denmark, and 174 in Norway.

CAUSES OF DEATH.

The number of deaths registered throughout Scotland during 1889, was 73,238, but in 672 cases the cause was so ill-defined, or specified in such a manner as to be of no use for statistical purposes.

The death-rate for the country as a whole is for both sexes conjointly, and per hundred thousand of the population as estimated to the middle of the year 1840, being for the males alone 1888, and for the females 1795, in each case a higher rate than that for the previous year. In the Principal and Large Town Districts the rate is in the case of the sexes conjointly, and of each sex separately, above the same for Scotland, in the other Districts they are below the total for the country. It is highest in the Principal Town Districts, viz., 2083 for both sexes; lowest in the Insular-Rural Districts, 1471.

During the year 1889, the number of deaths ascribed to Zymotic Diseases is 9743, which is 1779 more than occurred from the same last year, and is in the proportion of 247, in every hundred thousand of the estimated population, and constitutes 13·43 per cent. of all the specified deaths. The Principal Town Districts alone indicate a higher ratio than that for the whole country, and in the Small Town, and Mainland-Rural

Districts, the females had apparently suffered more from these diseases than the males. *Vide* Tables XXVIII. and XXIX.

In Table XXXII. the number and proportion of deaths from the chief Zymotic Diseases, and from ordinary causes are so arranged as to exhibit the mortality due to each during five different periods of life. Thus of the whole 9743, deaths from Zymotics at all ages, 6720 occurred during the first five years of life, 834 between 5–10 years, 248 between 10–15 years, 1401 between 15–60 years, and 540 at ages over 60 years; or 69·0 in every hundred such deaths took place during the first five years of life, 8·6 between 5–10 years, 2·5 between 10–15 years, 14·4 between 15–60 years, and 5·5 at ages over this, so that during the present year 80·1 per cent. of the total occurred during the first 15 years of life, and Table XXXIII. shows that of the total mortality in Scotland 25·95 per cent. of the deaths registered as occurring at ages under 15 years are due to Zymotics, 4·50 being the percentage of the same at ages over 15 years.

During the year Hooping-Cough caused 2268 deaths, and of these 2147 or 94·7 per cent. of the whole cut off children during the first five years of life, 118 or 5·2 per cent. occurring during the next five years. Measles come next with 1948 deaths accredited to it, 1765, or 90·6 per cent. of them occurring during the first quinquennial period of life, 137 or 7·0 per cent. during the next, 12 deaths occurring between 10–15 years, 32 between 15–60 years, and two at greater ages than this. Diarrhœa and Dysentery caused 1841 exits, 1262 or 68·5 per cent. during the first five years of life, the next greatest number being 351 or 19·1 per cent. at ages over 60 years, and 197 or 10·7 per cent. between 15–60 years, 17 deaths were registered between 5–10 years, and 14 between 10–15 years. Diphtheria caused 968 deaths, 624 of them or 64·4 per cent. of the whole during the first five years of life, 242 or 25·0 per cent. between 5–10 years, 48 or 5 per cent. between 10–15 years, as also between 15–60 years, and six at ages over this.

Fevers caused 912 deaths, the largest number of them 575 or 63·1 per cent. of the whole at ages between 15–60 years. Typhoid or Enteric caused the greatest number of those fever deaths, 795 being thus ascribed, 494 or 62·1 per cent. of them dying between 15–60 years, 107 or 13·5 per cent. between 10--15 years, 106 or 13·3 per cent. between 5–10 years, 64 or 8·1 per cent. between birth and five years, and 24 or 3·0 per cent. above 60 years. Typhus Fever caused 69 deaths, 61 or 88·5 per cent. of them at ages between 15–60 years. To Simple or Ill-Defined Fever there are 45 deaths; Cerebro-spinal Fever caused 2; and Relapsing-Fever 1. To Scarlet-Fever 701 deaths are due, 434 or 61·9 per cent. of them occurring in children between birth and five years of age, 183 or 26·2 per cent. between 5–10 years, 41 or 5·8 per cent. between 10–15 years, and also between 15–60 years, while two occurred at a greater age. Puerperal Fever caused 277 deaths. Erysipelas accounts for 273 exits, 110 or 40·3 per cent. of them being children under five years of age, 89 or 32·6 per cent. at ages between 15--60 years, and 66 or 24·2 per cent. at ages over 60 years, eight deaths occurring between the ages of 5--15 years. Syphilis causes 226 deaths, 191 or 84·5 per cent. of them being young children, 26 or 11·5 per cent. between 15--60 years, and eight at ages over 60.

Out of every hundred thousand of the inhabitants of Scotland 247 are estimated to have succumbed to Zymotic Disease of some form or other, which is equivalent to 13·43 per cent. of the total specified deaths. In the Principal Town Districts this rate is 333 per hundred thousand of population, or 16·00 per cent. of the total mortality; in the Large Town Districts the rate is 240 per hundred thousand, or 12·94 per cent. of the deaths; in the Small Town Districts the rate is 224 per hundred thousand, or 12·76 per cent. of the total deaths therein; in the Mainland-Rural Districts it is 152 per hundred thousand, or 9·72 per cent. of the deaths; and in the Insular Districts the rate per population is 96, or 6·53 per cent. of the deaths are of this nature.

Tables XXX. and XXXI. afford like information as regards the Prin-

In Edinburgh the proportion is 236 per hundred thousand of population, constituting 12·55 per cent. of the total deaths, of this ratio 51 is due to Hooping-Cough, 41 to Measles, 40 to Diphtheria, 38 to Diarrhœa, 19 to Fevers (Typhoid 13, Typhus 5), and 12 to Scarlet-Fever.

In Dundee 248 is the rate in which such deaths occurred, constituting 12·73 per cent. of the whole mortality, 89 of these are due to Hooping-Cough, 69 to Diarrhœal affections, 27 to Diphtheria, 18 to Measles, 14 to Fevers (13 being Enteric, and 1 Typhus), 4 to Scarlet-Fever, and 3 to Small Pox.

In Aberdeen the mortality rate is 265 per hundred thousand of population, or 13·77 per cent. of the whole; Measles accounts for 113 of those, Diarrhœa and Dysentery for 54, Hooping-Cough for 22, Fevers for 15 (14 being Typhoid), Diphtheria for 8, Scarlet-Fever for 4, and Small Pox for 1.

In Leith 355 per hundred thousand of the population succumbed to

Zymotics, equal to 17·45 per cent. of the total deaths. Of these 87 are due to Scarlet-Fever, 86 to Measles, 60 to Diphtheria, 43 to Diarrhœal affections, 37 to Hooping-Cough, and 16 to Fevers (13 being Enteric).

In Greenock the mortality from the same is at the rate of 272 per hundred thousand, or 13·37 per cent. of all, 74 of those come under Diarrhœa and Dysentery, 47 under Measles, 45 under Hooping-Cough, 41 under Diphtheria, 39 under Fevers (Typhoid 32, Typhus 5), 8 under Scarlet-Fever, and 2 under Small Pox.

In Paisley the death-rate per hundred thousand of population from such diseases is 293, or 13·92 per cent. of the whole deaths; Hooping-Cough causes the largest proportion of these, viz., 89, followed by Diarrhœa and Dysentery 82, Diphtheria 36, Fevers 31 (29 Typhoid, 2 Typhus), Measles 23, and Scarlet-Fever 16.

Perth exhibits a ratio of 195 deaths from Zymotics in every hundred thousand of its population, or 10·21 per cent. of all; Scarlet-Fever causes 76 of the above, Diarrhœa and Dysentery 46, Fevers 23 (20 of these being Typhoid), while Measles, Hooping-Cough, and Diphtheria each cause 7.

In Kilmarnock the proportion of such deaths per hundred thousand of population is 537 or 25·17 per cent. of the total deaths occurring there during the year are Zymotic in character. Diarrhœal affections are credited with 185 of this proportion, Scarlet-Fever with 131, Hooping-Cough with 80, Measles with 47, Fevers with 40 (36 Enteric, 4 Typhus), and Diphtheria with 7.

In Glasgow, Landward and Suburban, 283 in every hundred thousand of the estimated population died from Zymotic Disease, or 15·56 per cent. of all the deaths were such; of these 82 are Measles, 65 Hooping-Cough, 38 Diphtheria, 37 Diarrhœa and Dysentery, 19 Fevers (14 Enteric, 4 Typhus), and 13 Scarlet-Fever.

From Small Pox 5 males and 3 females were registered as dying during the year throughout Scotland—viz., 3 males and 1 female in Dundee, æt. respectively 42, 33, 32 and 27 years; 1 male in Aberdeen, æt. 32 years, 1 male in Greenock, æt. 39 years; 1 female in Ayrshire, æt. 2½ years and another female in the county of Edinburgh, æt. 21 years. With the exception of the male in Greenock who had not been vaccinated, the condition in this respect was not noted in the other cases.

From Measles 1948 deaths are registered throughout the country during the year, giving a mortality rate of 49 per hundred thousand of the inhabitants, and constituting 2·68 per cent. of the total deaths; 991 of these are males and 957 females. The Principal and Large Town Districts show the heaviest mortality from this cause, 77 per hundred thousand of the population of the former, and 48 of the latter; the lowest rate is in the Mainland-Rural Districts, viz., 21.

Scarlet-Fever causes 701 deaths, a rate of 18 per hundred thousand of population, not quite 1 per cent. of the total mortality—males 352, females

349. The heaviest mortality rate therefrom being indicated in the Principal and Small Town Districts, viz., 20 and 21 per hundred thousand of their inhabitants, the corresponding rate in the Insular-Rural Districts being but 8.

Hooping-Cough is the ascribed cause of 2268 exits, equal to 58 in each hundred thousand of the population, and 3·13 per cent. of the total deaths—males 1043, females 1225. The highest rate appears in the three Urban Districts, 91 in those of the Principal Town, 46 in the Large Town, and 45 in the Small Town Districts; the lowest in the two Rural, being 26 in the Mainland-Rural Districts, and but 8 in the Insular-Rural Districts.

Diphtheria caused 968 deaths, at the rate of 25 in every hundred thousand of the population, or 1·33 per cent. of the total deaths—males 444, females 524. The heaviest relative mortality occurs in the Principal Town Districts, viz., 33; its lowest in the Insular-Rural Districts, 6 per hundred

thousand of their respective populations. In the Large Town Districts alone is the male rate from the disease heavier than that of the female.

The deaths from Continued Fevers amount to 912, being at the rate of 23 in every hundred thousand of population, and forming 1·26 per cent. of the total mortality—males 501, females 411. The heaviest rate is in the Urban Districts, being 28 per hundred thousand of the inhabitants of the Large and Small Town Districts, and 23 in those of the Principal Town Districts, 19 and 15 being the rates respectively in the Mainland and Insular-Rural Districts. Typhus Fever caused 69 deaths, Relapsing-Fever 1 death, Cerebro-spinal Fever 2 deaths, and Fever of a Simple or Ill-Defined nature 45 deaths. To Typhoid Fever 795 persons succumbed—males 427, females 368, being together at the rate of 20 in every hundred thousand of the population. Table XXXVII. shows how 177 of these Typhoid deaths occurred in the Rural Districts and formed 86·34 per cent. of the total Fever deaths registered in the same, while in the Urban Districts 618 deaths occurred from Typhoid, equal to 87·41 per cent. of the total Fever Mortality therein. Typhus caused 14 deaths in the Rural Districts, or 6·83 per cent. of the Fever deaths there occurring, while in the Urban Districts they number 55, or 7·78 per cent. Diarrhœa and Dysentery caused 1841 deaths, equal to 47 in every hundred thousand of population, or 2·54 per cent. of the total deaths—males 958, females 883. Of this whole number 1516 are registered in the Town Districts and form a death-rate of 56 per hundred thousand of the inhabitants in the Principal Town Districts, one of 52 in the Large Town Districts and of 51 in the Small Town Districts. In the Rural Districts the rates are 31 in that of the Mainland-Rural, and 13 in

that of the Insular-Rural per hundred thousand of their respective populations.

During the latter part of the year under review, 1889, Influenza in an epidemic form made its appearance in Scotland, and we now give the months and districts in which the deaths are registered from which it was the cause. The total number of deaths are 59, to which may be added 3, in which Influenza, although a cause, was not given as the primary cause of death, making in all 62—males 30, females 32. During January there were 5 deaths—3 males and 2 females, 2 of the former and 1 of the latter in the Large Town Districts, and 1 male and 1 female in the Mainland-Rural Districts; during February the total was again 5, all females, 1 in the Principal Town Districts, 3 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts; during March there were 7 deaths—3 males and 4 females, 1 of the males and 1 female in the Principal Town Districts, 2 females in the Small Town Districts, 2 males and 1 female in the Mainland-Rural Districts; during April 4 deaths occurred—3 males and 1 female, 1 female in the Principal Town Districts, 1 male in the Small Town Districts, and 2 males in the Mainland-Rural Districts; during May 6 is the total—3 males and 3 females, 1 male in the Principal Town Districts, 1 male and 2 females in the Mainland-Rural Districts, and 1 male and 1 female in the Insular-Rural Districts; during June the deaths of 2 males occur, 1 in the Principal Town Districts, and 1 in the Mainland-Rural Districts; during July 2 females die from Influenza, 1 in the Principal Town Districts, and 1 in the Insular-Rural Districts; during

August 3 deaths occur, all females, 2 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts; during September 2 males succumb, both in the Mainland-Rural Districts; during October 3 die—1 male and 2 females, the former and 1 of the latter in the Large Town Districts, the other female in the Small Town Districts; during November the total rises to 8—males 4, females 4; in the Principal Town Districts the deaths of 2 males are registered, in the Large Town Districts of 1 male and 1 female, in the Mainland-Rural Districts 1 male and 2 females, and 1 female in the Insular-Rural Districts; in December there are 15 deaths from Influenza—9 males and 6 females, 7 males and 3 females in the Principal Town Districts, 1 female in the Large Town Districts, 1 male in the Small Town Districts, 1 male and 1 female in the Mainland-Rural Districts, and 1 female in the Insular-Rural Districts.

Cancer caused the death of 2643 persons, *i.e.*, in the proportion of 67 in every hundred thousand of the population of Scotland, and constituting 3·64 per cent. of the total deaths for the year—males 990, females 1653. The rate varies from 48 in every hundred thousand of the population in the Insular-Rural Districts, to 76 the highest in the Mainland-Rural Districts. The rate in the Principal Town Districts alone of the Urban Districts is above that for Scotland. In the Principal Towns it is seen from Tables XXX. and XXXI. how the highest mortality rate from the disease occurred in Edinburgh, viz., 104 in every hundred thousand of its inhabitants, followed by Aberdeen with a rate of 73, Dundee with 69, Perth with 66, Leith and Kilmarnock each with 65, Greenock with 62, Glasgow and Paisley each with 61, and Glasgow Landward and Suburban, with 47.

Diseases of a Tubercular nature are the ascribed cause of 9722 deaths, giving a rate of 246 in every hundred thousand of the population, or 13·40 per cent. of the total deaths—males 4710, females 5012. In the Principal and Large Town Districts the above ratios are exceeded, being in the former 293 per hundred thousand, or 14·06 per cent. of the total deaths, and in the latter 262 and 14·14 per cent. respectively. The rate to population is in the Small Town Districts 238, in both the Mainland-Rural and Insular-Rural Districts it is 183. Phthisis causes by far the larger number of deaths of this nature accounting for 7098 altogether—males 3404, females 3694, equivalent to 180 in every hundred thousand of the population, or 9·78 per cent. of the total deaths. As usual the death-rate from this disease is

---

TABLE XXXVII.—Deaths from Fever in 1889.

FEVERS.	RURAL DISTRICTS.		TOWN DISTRICTS.	
	Deaths from each Fever.	Percentage to Total Fever Deaths.	Deaths from each Fever.	Percentage to Total Fever Deaths.
Typhus	14	6·83	55	7·78
Enteric	177	86·34	618	87·41
Relapsing	1	0·49	—	—
Cerebro-Spinal	—	—	2	0·28
Simple or Ill-defined	13	6·34	32	4·53
ALL FEVERS	205	100·00	707	100·00

heavy in each District, being in the Principal Town Districts, in the ratio of 209 in each hundred thousand of the population, in the Large Town Districts it is 186, in the Small Town Districts 171, in the Mainland-Rural Districts 142, and in the Insular-Rural Districts 161. At ages under 15 years, in every hundred deaths among the males throughout Scotland 11·3 occurred from Consumption, between 15–45 years 68·3, and at ages over this 20·4, and among the females at the early age 13·7 in every hundred succumbed from the same, 71·9 between 15–45 years, and 14·4 at greater ages. On comparing the death-rate from Phthisis with the death-rate in the Principal Towns it is found that in Paisley 11·19 per cent. of the total deaths are from this cause, in Kilmarnock 10·88 per cent., in Dundee 10·79 per cent., in Glasgow Landward and Suburban 10·57 per cent., in Perth 10·21 per cent., in Greenock 10·18 per cent., in Leith 9·99 per cent., in Aberdeen 9·91 per cent., in Glasgow 9·87 per cent., and in Edinburgh 9·23 per cent.; Tabes Mesenterica caused 851 deaths—males 419, females 432; Tubercular Meningitis 1163—males 602, females 561; and Scrofula 610—males 285, females 325.

From Disease of the Brain and Nervous System there are 8535 deaths, equal to a rate of 216 in every hundred thousand of population, and forming 11·76 per cent. of the total mortality—males 4318, females 4217. These proportions are overtopped in the three Urban Districts, those in the two Rural Districts being under; the lowest, 123, is in the Insular-Rural Districts, or 8·35 per cent. of the total mortality in the same. Among the Towns, Nervous Diseases were proportionately most marked in Perth, where 278 in every hundred thousand of its inhabitants thus succumbed, followed by Paisley in which 264 did likewise, in Glasgow 256, in Glasgow Landward and Suburban 247, in Greenock 246, in Aberdeen 230, in Dundee 226, in Kilmarnock 210, in Edinburgh 206, and in Leith 199. Among such diseases Paralysis caused 1840 deaths—851 males and 989 females; Apoplexy 2221 deaths—1016 males and 1205 females; and Convulsions a total of 1084—males 626, females 458.

Diseases of Circulatory System, the Heart and Blood Vessels caused 5992 exits, or in the proportion of 152 in every hundred thousand of the population, and form 8·26 per cent. of the total deaths—males number 2842, females 3150. This rate is slightly exceeded in the Principal Town Districts, Small Town Districts, and Mainland-Rural Districts, being lowest in the Insular-Rural Districts where it is 96. Among the Towns such diseases are found to stand as causes of death per hundred thousand of the population as follow:—192 Edinburgh, succeeded by Kilmarnock with 185, Greenock 178, Perth 172, Aberdeen 165, Dundee 164, Leith 149, Paisley

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1880–1889; specifying those from Typhus and Enteric Fever.

MONTHS.	Total Fever Deaths.	Typhus.	Enteric.	MONTHS.	Total Fever Deaths.	Typhus.	Enteric.
January .	338	75	254	July . .	249	46	186
February .	286	78	190	August .	315	67	236
March .	294	85	190	September .	395	60	324
April . .	304	85	201	October .	377	39	329
May . .	338	71	251	November .	350	67	269
June . .	286	59	205	December .	370	69	281

146, Glasgow 136, and Glasgow Landward and Suburban 128. Disease of the Heart caused 5222 deaths—males 2447, females 2775.

Diseases of the Respiratory Organs other than Phthisis, claim 13,811 lives throughout Scotland, equal to 350 in every hundred thousand of population, and constitute 19·03 per cent. of the total deaths—the males number 7099, the females 6712. This rate varies in each district, being 437 per hundred thousand in the Principal Town Districts, or 21·00 per cent. of the total deaths therein registered; in the Large Town Districts the proportions are 353 to population, or 19·04 per cent. of the deaths; in the Small Town Districts 309 to population, or 17·58 per cent. of the mortality; in the Mainland-Rural Districts 262 to population, or 16·67 per cent. of the deaths; and in the Insular-Rural Districts 230 per hundred thousand of the population, or 15·65 per cent. of the total deaths. Bronchitis caused 7033 deaths—males 3316, females 3717; Pneumonia 3994 deaths—males 2296, females 1698; and Croup caused 914 deaths—males 464, females 450. Among the Principal Towns, we find in Glasgow 550 deaths in every hundred thousand of the inhabitants occurred from one or other form of Pulmonary Disease, Phthisis excepted, or 23·28 per cent. of the total deaths were of this nature; followed by Paisley with 438, or 20·77 per cent. as the corresponding ratios; Greenock coming next with 431, or 21·17 per cent; Leith with 400 or 19·62 per cent.; Dundee with 398, or 20·44 per cent.; Kilmarnock with 373, or 17·52 per cent; Glasgow Landward and Suburban with 359, or 19·76 per cent.; Edinburgh with 353, or 18·81 per cent.; Aberdeen with 345, or 17·93 per cent., and Perth with 340, or 17·82 per cent.

From Diseases of the Digestive System 5452 deaths are registered, a rate of 138 per hundred thousand of population, and forming 7·51 per cent. of all the deaths—males 2686, females 2766. A higher proportionate mortality is indicated from these affections in the Urban than in the Rural Districts, and in all three Town Districts the rate is somewhat over that for the country as a whole. In the City of Aberdeen the rate is 159 per hundred thousand of its inhabitants, followed by Dundee with one of 157, Glasgow with one of 155, Greenock with one of 148, Paisley with one of 143, Leith with one of 139, Edinburgh with one of 131, Perth and Glasgow Landward and Suburban each with one of 122, and Kilmarnock with one of 102. Enteritis caused 1137 deaths; Peritonitis 630; Hernia 153; Liver

---

TABLE XXXIX.—The Twenty-two most fatal Causes of Death in Scotland in 1889, arranged in the order of their fatality.

DISEASES.	Proportion of Deaths to 100,000 living.	DISEASES.	Proportion of Deaths to 100,000 living.
Phthisis	180	Measles	49
Bronchitis	178	Diarrhœa and Dysentery	47
Diseases of Heart, &c.	152	Paralysis	47
Age	115	Tubercular Meningitis	29
Pneumonia	101	Enteritis	29
Violent Deaths	71	Fractures and Contusions	28
Cancer	67	Convulsions	27
Atrophy and Debility	59	Diphtheria	25
Hooping-cough	58	Croup	23
Developmental Diseases of Children	56	All Liver Diseases	23
Apoplexy	56	Tabes Mesenterica	22

Diseases 919; Ileus, Stricture of the Intestines, and Intussusception together 383.

From Diseases of the Urinary Organs 1902 deaths occur being 48 in every hundred thousand of population or 2·62 per cent. of the total deaths from all causes—males 1197, females 705. Acute Nephritis causes 334 deaths; Brights Disease 702; Calculus 35; other Diseases of Bladder and Prostate 354; while 319 are due to other Diseases of the Urinary System not specially differentiated.

Diseases of the Organs of Generation cause 259 deaths—males 26, females 233; Ovarian Diseases cause 73 deaths, and Uterine Affections 124. Diseases incidental to Parturition other than Puerperal Fever, to which 277 deaths are due, cause 346, together giving a total of 623.

To Diseases of the Organs of Locomotion, of the Bones and Joints, 469 deaths are due—males 249, females 229, and Diseases of the Skin caused the deaths of 120 males and 121 females.

From Developmental Diseases not including Old Age, there are 2191 deaths—males 1249, females 942, of which Premature Birth accounts for 1796; Atelectasis for 105; Cyanosis, Spina Bifida, and other Congenital Defects 340—males numbering 161, females 179.

From Old Age, 1772 men and 2759 women are reported as having died, equal to a mortality rate of 115 in every hundred thousand of population, or 6·24 per cent. of the total deaths. The male deaths registered during the year as occurring at ages between 95 and 100 years number 41, the female deaths at like age 77, while 9 of the men and 15 of the women are stated to have been 100 years or over at death. Of the men five were 100 years of age, two 101 years, one 102 years, and one 112 years, while six of the women were 100 years, six 101, one 102, and two 105. Eleven of the females were widows.

To Violence 2794 deaths are ascribed in the persons of 2017 males and 777 females, together equivalent to a mortality rate of 71 per hundred thousand of population, and equalling 3·85 per cent. of the total deaths. Fractures and Contusions account for 1123—males 845, females 278; Burns and Scalds for 279—males 136, females 143; Drowning for 608—males 508, females 100, and of these 529 are Accidental, and 79 Suicidal Drowning. Accidental Suffocation killed 209 males and 125 females, and Accidental Poisoning ended the lives of 48 males and 21 females.

The Poisons which accidentally proved fatal were Laudanum or other Narcotics of like nature in the case of 23 males and 8 females, Chloroform 1 male, Chloral Hydrate 1 male and 1 female, Belladonna 1 male, Strychnia 1 male, Carbolic Acid 4 males and 1 female, Alcohol 3 males, Phosphorus 2 males and 2 females, Bromidia 1 male, Antimony 1 male, Lead 1 female, Saltpetre 1 female, Sulphuric Acid 4 males and 1 female, Nitric Acid 1 male and 1 female, Foreshot 1 female, Eating Fungi 1 male, while in the case of 4 males and 4 females the special poison is not stated.

Under Homicide there fall 16 males and 16 females.

By Suicide 148 males and 75 females ended their existence during the year and as follow:—10 males shot themselves, 27 males and 14 females so cut or stabbed themselves that death resulted, 13 males and 9 females took poison, 43 males and 36 females drowned themselves, 42 males and 13 females hanged themselves, and 13 males and 3 females had recourse to some other method than the above.

In the Suicidal Poisonings Laudanum was taken by 9 males and 3 females, Chloroform by 1 male, Chloral Hydrate by 1 female, Carbolic Acid

by 1 female, Arsenic by 1 female, Nitric Acid by 1 male and 1 female, Oxalic Acid by 1 female, while in the case of 2 males and 1 female the special poison is not stated.

The Suicides are localized in the five groups of Districts as follows:—59 males and 43 females in the Principal Town Districts, 15 males and 6 females in the Large Town Districts, 31 males and 10 females in the Small Town Districts, 42 males and 16 females in the Mainland-Rural Districts, and 1 male in the Insular-Rural Districts.

There were 2 cases of Judicial Hanging in Scotland during the year—1 male and 1 female.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of 1889 are extracted from the Astronomer-Royal's Notes appended to the Monthly Reports issued by the Registrar-General.

January was a warm, dry, and calm month, the barometric pressure being high, and the barometric range small.

The weather of *February* was of a very unsettled character, and generally cold, though with a couple of intervals of high temperature.

The chief characteristics of *March* were high barometric pressure, small barometric range, a mean temperature only slightly below the normal, and rainfall little more than half the average amount for this month.

April was characterised by decidedly steady barometric pressure, somewhat below the average of the last thirty-three years. The temperature was also low, with a small range.

The steady barometric pressure that characterised the month of *April* was even still more apparent throughout *May*, the monthly range being but 0·645 inch, as compared with 1·097 inch, the mean for the last thirty-three years.

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1889, compared with the Mean of the Ten Years 1871–1880.

	Year 1889.			1871–1880.	
Months.	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per Annum, or 1000 per Month.	Monthly Proportion of Deaths.	Mean Temperature.
	°				°
January	39·5	6767	1109	1154	37·5
February	36·8	6034	989	1061	38·6
March	39·6	6808	1116	1138	40·2
April	42·8	6626	1086	1064	44·2
May	53·1	6177	1015	1040	48·4
June	57·1	5410	887	939	54·7
July	55·9	6008	984	921	57·8
August	55·9	5526	905	893	57·3
September	52·1	5253	861	834	52·6
October	45·6	5689	933	885	46·5
November	43·1	5639	924	949	40·2
December	39·0	7266	1191	1122	37·0
Year	46·7	73,203	12,000	12,000	46·2

June was characterised by somewhat high and unusually steady barometric pressure, with a considerable predominance of light easterly winds, and high temperature, accompanied by small rainfall.

Barometric pressure in *July* was average as to its amount, but somewhat extreme as to range.

August was characterised by relatively low and unsteady barometric pressure.

September was chiefly distinguished by high barometric pressure and small rainfall, accompanying light winds.

October was remarkable for low and very variable barometric pressure, associated with low but relatively uniform temperature.

November was remarkably warm and dry, with high barometric pressure.

December was chiefly remarkable for high barometric pressure, varying slightly more than is usual at this season.

From Tables XL. and XLI. some information may be obtained as to the Meteorological conditions of each month, and the mortality corresponding to the same, on the former table there being given the mean temperature for each month of the year under review, and for comparison the same for a decennial period (1871–80).

The mean temperature of the last month of 1888, was 40°·5, which low reading of the thermometer is continued during the first three, in fact four months of 1889, when the usual rise occurs during the latter month of spring

---

TABLE XLI.—Meteorology of Scotland for 1889, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also, the Number of Births, Deaths, and Marriages registered during each Month of the Year 1889, as stated in the Quarterly Reports.

1889.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	YEAR

and continuing during the summer season; the last three months of the year as with the first four show a lower mean temperature than that of the year which is 46°·7. Table XLI. indicates how as a rule during the colder months the highest mortality rate occurred, viz., in January, March, April, and December, in which latter month it was at its highest 9·93 per cent., while during the warmer months the reverse holds good generally, the death-rate being at its lowest in September, when 7·18 per cent. of the deaths are registered.

Table XLII. refers especially to the various events occurring in eight of the Principal Towns in Scotland, and in them we find the maximum of the daily deaths to be 82 during January, 80 during February, 83 during March, 85 during April, and 91 during December, the minimum 68 during June, and 65 during August and September. By means of this Table there can also be traced in a general manner how the occurrence of the more ordinary causes of death (Zymotics and some others), contributed to the mortality among the inhabitants of these towns during each month of the year. Thus six cases of Small-Pox proved fatal in them, and all during January, 5 males and 1 female, 2 more it may be remembered occurring in other parts of the country. The greatest number of deaths from Measles and its sequelæ were registered during the months of March, April and May, the smallest number during August, September and October. Scarlet-Fever which during no month caused an excessive mortality bulks most largely during the three last months of the year, as also was the case with Diphtheria, the lowest numbers in each case occurring also in nearly similar months. Hooping-Cough causes a greater number of deaths in each month than any other of the Zymotic class given, with the exception of Measles during March and December, which then somewhat overtops it, the greatest mortality from Hooping-Cough is during the four months March, April, May and June,

TABLE XLII.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Disease, in Eight of the Principal Towns of Scotland, during each Month of the Year 1889.

1889.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

months during which the cold east wind blows more or less constantly over a great part of Scotland. Fevers attained their maximum during the autumnal and winter months, being highest during September. Diarrhœal affections are as usual most prevalent during the summer and autumnal months, the highest mortality occurring therefrom during July, August, September and October, the lowest during the earlier months of the year. Consumption in those towns causes many deaths during each month, the highest number 291 being registered during May, 260 during July, and 246 during December.

Diseases of the Respiratory Organs as Bronchitis and Pneumonia are specially induced by climatic conditions, and are the cause of very many deaths and that during each month of the year. During December, January and March, the number of deaths are greatest, viz., December with 777, January with 656, and March with 648. Much the same is found with regard to Diseases of the Heart and Circulatory Organs, which with the above are in like manner affected towards good or bad, by fine and genial weather on the one hand, or by cold and damp on the other. Diseases of the Brain and Nervous System stand likewise on a similar platform being most fatal during the earlier and later months of the year, those which are most inclement.

Old Age in the aforesaid towns is most marked as a cause of death during December with 108, and January and March each with 99. Tables XLIV. and XLV. are constructed to show the monthly mortality as it occurs at four periods of life, viz., in childhood, during adolescence, among adults, and the aged.

Thus among children (0–5 years) 11,527 died during the year, *i.e*, 41·3 per cent. of the whole deaths, the largest number occurring during the months of March, April, May and December, months when Measles and

Hooping-Cough were specially fatal, and deaths from Diseases of the Respiratory Organs were numerous.

Among adolescents (5–20 years) 2530 deaths are registered or 9·1 per cent. of the whole, most marked during March, April, July and December, those months when deaths from Respiratory Affections, including Consumption, as also Measles were many.

Among adults (20–60 years) 8365 deaths occurred, or 30·0 per cent. of all, most marked during January and December, when affections of the Respiratory and Circulatory Organs, and of the Nervous System were prominent as causes of death, the minimum at this age being during August and September.

Among the aged (60 years and over) there are 5469 deaths, or 19·6

TABLE XLIV.—Monthly Mortality at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1889, and Proportion at each Age in every Hundred Deaths per Month.

per cent. of all the mortality at this age, again being most pronounced during the colder and most inclement months of the year.

Among the whole population of these towns, the deaths during each month when equalized to a similar length of 31 days ranked as follow in order of frequency:—December with most, followed by April, March, January, May, February, November, July, October, June, August, and September.

I have the honour to be,

——— Sir,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

General Registry Office of Births, &c.
Edinburgh, 11*th December* 1891.

VACCINATIONS IN SCOTLAND—1889.

No. of Division, &c.	REGISTRATION GROUPS, DIVISIONS, AND COUNTIES.	Successfully Vaccinated.	Vaccination Postponed.	Insusceptible of Vaccine Disease: On the ground of Constitutional Insusceptibility.	Insusceptible of Vaccine Disease: In respect of the Children having already had Small-pox.	Insusceptible of Vaccine Disease: On the ground of previous Successful Vaccination.	Died before Vaccination.	Removed from District before Vaccination, or otherwise unaccounted for.	Total Births for 1889.

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing To
of 2000 Inhabitants and upwards are printed in small capitals, thus:—Carluke.

N.B.—An asterisk "*" is prefixed to those Districts which comprise one or more Parishes or parts of Parishes, and the c
ponent parts of these Districts will be found at page 454.

A dagger "†" is prefixed to those Districts which consist of only a part of a Parish of the same name.

* The actual number of Districts is 1049—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
